Page 1 - Editorially Speaking . . . !

This 'n' That . . .

NEWS ITEM... It was reported today that Consumer spending was down .7% from last month. Analysts indicated they felt a slight reduction in variety and choices of goods in the marketplace may be the contributing factor.

I BEG YOUR PARDON!

Did they say a reduction in variety and choices. Ye Gads!!!!!! There's so much variety and so many choices being added to everything today, a simple fella like me is getting so confused I have to now check the menu at McDonald's.

Henry Ford came out with the "Model T". It was said you could get it in any color you wanted long as you chose black. Best selling car in history! No guesswork.

Today, there must be a zillion colors available for cars. Maybe even more colors than are car models to choose from. How long did it take you to choose your last car?

Now, before you start jumping on ole Wayne for crying too much, or calling him an "ole fogey" (well that part may be right). Lets take a stroll down the shopping malls of our minds. You just might agree with me, whether you admit it or not.

Pizza!! We all love pizza! Have you noticed lately. They come small, medium, large, extra large, and huge. They come round, square, oblong, and cubed. You can get every topping known to man. One place advertises over 100 toppings (you got to be kidding)

Uh . . . Yes, I'll do a large one with all 100 toppings, please! What kind of crust? Uh . . . let me think on that a moment!

Crusts. Once pizza came with a special crust made especially for pizza. Today, you can get thin and crispie, sourdough, thick and chewey, crispie filled, chewy stuffed, New York style, and ole fashioned. New York style, or ole fashion is generally the "real" pizza crust before someone started messing with it.

You can eat your slice from the front or backwards, or down the side, or across the middle. There's "meat lovers" pizza, and there's "veggie" (I hate that word) pizza.

Kentucky Fried Chicken. Harlen Saunders is probably turning over in his grave. "Thin and Crispie" - "rotisserie roasted." What ever happened to the 13 herbs and spices and the steam pressure cooking that made KFC THE chicken to eat? I expect to see RJR Nabisco put cookies in.

Actually happened! Was looking for something simple . . . I went to the super market to get some Campbells Tomato soup. After searching 100 feet of shelves and 175 different kinds, I finally chose "Tomato Classic". No! No simple Tomato anymore. And it wasn't classic either.

About the SERA Repeater Journal Magazine

The Repeater Journal, voice of SERA is published quarterly, the first Friday of the months of February, May, August and November of each year and mailed free to members of South Eastern Repeater Association, Inc., an eight state repeater coordinating organization made up of repeater owners and users. Permission is granted for use of material other than repeater indexes contained in the Repeater Journal (See important note this page) provided proper credit is given. The Repeater Journal Editor will swap newsletters with other Repeater Organizations, News organizations and clubs upon written request. DEADLINES: Ad space reservations are the 20th of the month, and ad copy due the 1st of the next month, one month prior to publication. News deadlines are the first of the month prior to publication month. The Repeater Journal is entered as Third Class Mail at the Post Office in Greensboro, NC. The Repeater Journal/newsstand cover price is \$3.00 and is available from numerous retail Amateur Dealers in the southeast. All news and newsletter exchanges should be mailed to the Editor: Wayne C. Williams, K4MOB, 600 Lakedale Road, Colfax, NC 27235, (Phone or fax) (910) 993-5881, or E-Mail: k4mob@nr.infi.net

About the South Eastern Repeater Association, Inc.

SERA, South Eastern Repeater Association, Inc. is the largest, most well known, non-profit Repeater Coordinating Organization in the United States. SERA territory covers over 2,185 repeaters available to over 90,200 Amateurs covering 329,000 square miles from the Southeastern member States of North Carolina, South Carolina, Virginia, Tennessee, West Virginia, Kentucky, Georgia and Mississippi. SERA celebrates its 26th year of service in 1997 with a continuing goal - to serve the repeater owners and users of the Southeast by providing a voice of communications, information and education with the publication of the Repeater Journal, and the guidance of our State (Director) Coordinators, officers and volunteers. Support, comments and recommendations are appreciated.

About SERA Associate Membership (Repeater Users)

Amateurs, especially repeater users, are invited to join SERA as Associate Members. Only \$8.00 per year will enable Amateurs to support the organization and receive the Repeater Journal. Associate Membership deadlines are the 15th of the month preceding months of publications - (Jan. 15, April 15, July 15, and October 15). Persons joining or renewing their memberships must have their application into the Tobaccoville Post Office Box by those deadlines to receive the next upcoming Repeater Journal, published the first Friday of February, May, August and November. Memberships received after deadline will not receive next to-be-published Repeater Journal, but instead will receive the forthcoming issue the following quarter. HOT-P Associate Memberships (Repeater Journals mailed 1st Class rate) are limited to one year memberships at \$14.25 per year. Regular membership Repeater Journals are mailed 3rd Class Bulk Mail. SERA does not issue receipts for Membership applications, nor are Repeater Journals forwarded to new addresses. If you move, we must be notified. Members should wait until next Repeater Journal comes out to report any problems. Write SERA Associate Membership, P.O. Box 215, Tobaccoville, NC, 27050-0215 for further information. Associate Members may hold appointive offices and positions within the South Eastern Repeater Association, Inc.

About SERA Full Repeater Membership (Repeater Owners)

Officers and Directors are elected from Repeater representatives who are SERA Full Members. Any repeater owner or club may join SERA as a Full Member if they have an operable repeater on the air. Full Membership application, coordination information (if not on file) and \$20.00 should be submitted for the annual Full Membership fee. Two Full Members, named and listed on the application by the owner, receive the Repeater Journal from each application. The Full Member repeater is also appropriately recognized as a SERA supporter in the repeater index with an asterisk (*) code. All Full Memberships expire on December 31 of each year. Write SERA Membership, P.O. Box 215, Tobaccoville, NC 27050-0215 for further information.

NOTE: The SERA Repeater Journal is Copyright 1997 by The South Eastern Repeater Association, Inc. Original stories, text and charts may be reproduced or re-printed by any organization without prior consent, provided credit is given. The SERA Repeater Index may be published or reproduced in any form by any publication or electronic means to be distributed without charge. Appropriate credit must be given to the SERA Repeater Journal. Reproduction or publication of the SERA Repeater Index in any form, mechanically or electronically for a charge is prohibited without prior written consent of SERA, Inc. All other rights reserved.

SERA Winter Board Meeting Held

JAY MABEY, NU0X, editor of the ARRL National Repeater Directory (left) receives the copyright release, and data disc containing over 2,100 repeater listings for the SERA South Eastern states. The disc was presented to Mabey by Dave Shiplet, AC4MU, President of SERA. Looking on from the left: Don Williams, WA4K, SERA Vice-President, Ray Adams, W4CPA, Treasurer, and H. Alex Hedrick, Jr., N8FWL, Secretary.

-Repeater Journal staff Photo

-by Wayne C. Williams, K4MOB, Editor

The SERA Board of Directors held their Winter meeting January 4-5 at the Holiday Inn, at Pigeon Forge, TN.

The well-attended event also had present several new officers as well as several new Repeater Journal correspondents who had just been appointed.

Special Guest was Jay Mabey, NU0X, editor of the ARRL National Repeater Directory. Jay aside from a special visit and a special tour of the Smokies was to receive officially the SERA repeater data for the 1997-98 National Repeater Directory.

Newcomers to the Board included: Vince Ott, WD4NUN who has been named an Assistant Director for South Carolina. Director Bill Jones said for the time being, he will switch coordination to the western part of the state, and Vince will be assigned coordination in the eastern half of South Carolina.

New for the State of North Carolina was Todd Robinson, KE4JMH, Assistant Director for NC, western portion. Assisting Director Danny Hampton, K4ITL in the eastern portion of the state is Frank Lynch, KE4ZEQ.

The new vice-director for Virginia, Douglas Sharp, K2AD was introduced by Director, Don Williams, WA4K. He said Doug will handle most of the eastern half of the state while he will coordinate the western half.

(Please see additional information in the Election results story).

New Journal Correspondents

Wayne Williams, K4MOB, editor of the Repeater Journal introduced several new state writers in attendance to the Board. He said more would be appointed as volunteers come forward from states still lacking a news corre-

spondent. Williams then read the list of correspondents and requested they all be placed on the SERA internet List Server. The request was approved. Most all new correspondents have their introductory stories in the Journal this issue. Briefly, they are:

David L. Bower, K4PZF - Features
Bob Gault, KD4NEC - West TN
Wayne Houser, KQ4EG - East TN
Mike Brigham, W1CLS - East VA
Curtis Harbin, AE4BT - NE TN
Fred Jones, WA4SWF - East KY

The new Repeater Journal correspondents join our existing ones:

Cindy Rogers, KR4LS - happy hamet
Barbara Marsh, KB8GGG - WV
Gene Fegely, K3EJG - NC
Ed Frank, KC4OOZ - East SC

Williams told the board his goal was to have every state represented by a good writer, and make the Journal a news and information source that would be required reading for every ham in the Southeast.

Associate Membership Drive

The Board received a presentation on the "Selling of the Organization." Included was a brochure that dealt with the need for keeping a strong membership of Associate Members (repeater users) as well as Full Members (repeater owners/sponsors).

It was noted that Associate Membership had dropped considerably over the past 10 years, even though several promotions, including last years expenditure of over \$4,000 in awards had been held.

The new proposals deal with working with clubs and hamfests. Directors and Board members were urged to contact local clubs and encourage internal membership drives within the clubs,

taking advantage of the special club bonus for signing up SERA members.

For hamfests, proposals from setting up a SERA booth, to an elaborate promotion in conjunction with the sponsors which included custom printed brochures being passed out, and the sponsor providing personnel to man a table to receive memberships.

New 18 x 24 SERA signs were given out to members present. Additional small table signs will be made and passed out along with applications and brochures on a request basis.

Several Directors indicated they intend to see that every hamfest in their state will be covered with a SERA booth able to solicit memberships.

Full Membership is running at a record level for SERA. It is Associate membership which has fallen off in past years.

Secretary Alex Hedrick announced that the SERA Web page name we had applied for was approved. He said the new name, which is much easier to remember will link directly with the existing name to access the SERA Web.

The new web page name is:

[HTTP://www.sera.org](http://www.sera.org)

The Board deferred direct action on repeater listings changes. Initially, the board had agreed to certain restrictions on the listing of repeaters that had not returned data sheets to SERA over the past 3 years. The reasoning, if owners had not returned a data sheet in that period of time, perhaps they were no longer on the air. With numerous checks via telephone over the past weeks, many directors have found most of the repeaters are on the air, it was just that the owners refused or ignored the requests for reasons of their own. The coordinators decided to take the long way around this situation to protect innocent and cooperating repeater owners in times of coordination.

The main problem likely to occur if the situation is not corrected . . . many of the unknown repeaters have moved, or made some change, or has never provided the coordinator with correct figures as to where the actual location of the repeater is. This situation can easily cause a bad and embarrassing coordination. Thus, even though some repeater owners have seen fit to still not cooperate, SERA feels, we need to go the extra mile to try and get the situation corrected.

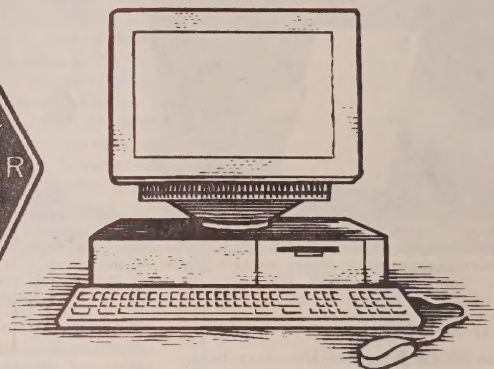

The repeaters are listed in a special section, labeled "Unknown" repeaters. Owners finding their listing in this category are urged to contact SERA immediately at the Post Office Box number.

Minor corrections were made to the SERA 220 MHz. Frequency Utilization Plan. The words "channel guard" were replaced with "Guard Band" where shown. Control & Link Frequencies were defined as between 223.91 and 224.08.

Charlotte Hamfest

So Much Happening

- Over 180 commercial exhibit booths
- All major manufacturers represented
- Swapfest tables (pre-registration only)
- 104,000 sq. ft. of indoor exhibit space
- Convenient parking for 3,500 cars
- Reanoke Division Convention
- Walk-in VEC Testing Sunday by WCARS-VEC
- Great Forums both days
- Ladies Activities
- Fabulous prizes

WVs Ted Wolfe, WD4KHL dies at hospital

-by Wayne C. Williams, K4MOB
SERA Repeater Journal Editor

He wrote about West Virginia hams in the Repeater Journal - never missing a deadline in 18 years.

We were saddened to hear the news in December of the death of Ted Wolfe, WD4KHL. Ted died in the Charleston (WV) Memorial Hospital in the early hours of Dec. 9. He had been taken there from his home the prior week.

Ted had been suffering from a form of cancer for the past 2 years. Last July and August, he reported it was in remission, and he was going home.

His friend, Sam Moore, W8SND said

Ted Wolfe, WD4KHL

-by Sam Moore, W8NCD

I wanted to write a few words about my dear friend Ted Wolfe, so perhaps you might know him, as we all have known him for so many years.

Ted has many friends, the foremost being Gary White, WD8OMB. They grew up together in Cabin Creek (WV). Another "fmaous" person from the area was basketball great Jerry West, "Zeke of Cabin Creek."

Ted went to public school in Logan, and moved back to Cabin Creek when his father, a railroad man was sent back there.

Later, Ted went to Marshall College, then worked at WSAZ-TV in Huntington. His career also included newspaper writing, radio station news, and disc jockey work. He was a school teacher for a time in Wyoming County, and then went to a radio station in North Carolina, where he became interested in ham radio and got his license as WD4KHL.

I first met Ted on 2-meter FM. We immediately found several things in common. We had both been in Hawaii for a time. Ted was working for a Times-Warner TV station in photography and newscasting. We had both met Hitashi Nose the friendly well-known DXer in Honolulu.

At the time we met Ted was working at WCHS-TV in Charleston in the news department. My company was processing the 16mm news film for them and others (video tape wiped out that business - later). Ted and I always had much to talk about.

He was a veteran of the Korean war and was an avid reader of military novels and History.

Among his fascinations in Amateur radio became Packet. He got very good at it and wrote much in his column about his newly found interest.

We have all lost a good friend. One who always tried to advance knowledge as a teacher in the true sense of the word. We shall miss him.

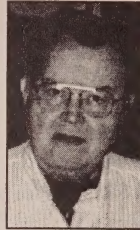

that Ted was doing fine up to Thanksgiving. He said that his friend became sick after the holiday and ultimately was taken to the hospital the first week of December.

Ted was a giant of a man. He was a friend's friend. He loved his family, his home town, West Virginia and ham radio. He loved writing about all his ham friends in the SERA Repeater Journal, which he faithfully did for over 18 years.

His columns kept up with the live of West Virginia hams over the years. He covered their travels, their clubs, churches, repeaters, walk-a-thons, emergencies - everything that happened in his beloved state.

Ted was never late with his stories. During the entire period, we never had cause to worry that a manila packet would not be in the mail on or around deadline.

His stories were always filled with the fun things, the good things that men, women and children did in Amateur radio. He brought out the good things in the hobby, and the good things the hobby did for his home state.

Ted Wolfe, WD4KHL

So many times, this editor sat back and wished - "every ham in West Virginia needs to read this man's stories." Unfortunately not all did, but those who have followed Ted Wolfe all these years in the Repeater Journal have had just a little bit of heaven in his words on paper about his passion for ham radio and his neighbors.

We are all just a little better for it too. Like all things in this world, "time marches on," but Ted will still march with us in time.

Thank you Ted for many hours of delightful reading about West Virginia.

John Thernes, W4ZN resigns

■ Was ARRL Great Lakes Div. Vice Director

-from ARRL Electronic Letter

Great Lakes Division Vice-Director John Thernes, W4ZN of covington, KY has announced his resignation, effective last December.

ARRL President Rod Stafford later named Dave Coons, WT8W of New Carlisle, OH as the new Vice Director. Coons 65 is a retired postal worker.

Thernes, 48 said the decision was very difficult, but he plans to pursue a full-time graduate program to obtain his MBA in graduate school. It was Thernes in the mid 1980's that approached SERA on behalf of the repeater owners in Kentucky. Later Kentucky joined and became a full district.

SERA Full Membership Drive going Well

The annual drive to resign Full Member repeaters is well underway. As of the middle of January, slightly more than last year at the same time had sent in their membership dues.

An interesting aspect this year, which we cannot explain is the unusually large number of out-of-SERA territory repeaters who are voluntarily joining our organization. We are not their official coordinator, yet they see fit to monetarily support our organization. Presently 29 out of territory repeaters are now full members from the states of Northern Virginia, Alabama, Indiana, Florida, New Hampshire, New York, Texas and Vermont.

On the local side of things, North Carolina leads the list with 248 repeaters in any state joined with 248 for 60.2% of all repeaters in the state.

Leading the way in percentage of membership within a state is Virginia with 61.2% or 156.

The overall full membership in SERA this year is 1,161. In the 8-states there are 1,132 members among the 2,184 repeaters for a 51.8% membership ratio.

In our annual repeater census, the area gained a total of 56 repeaters from Feb. 1996 to Feb. 1997. Georgia remains our largest state as far as repeater numbers are concerned with 418. North Carolina is a close second with 412.

See the accompanying chart for full details of repeater membership in your state. Ask your repeater owner if he joined SERA. Get him to sign up and be a full member supporter of SERA.

SERA Full Membership Report

Full Membership - By State - By Year - From 1988 to Present.

OUT OF SERA TERRITORY REPEATERS JOINING AS FULL MEMBERS - FOR 1997 -- 29

(1) Mississippi assumed SERA District Status in late 1989.

(2) Total Virginia list does not include 90 or more repeaters in T-MARC Territory, (North of Highway 33 and Latitude 38-degrees North), and 9 Repeaters in the West Virginia Panhandle area. Updated - 1-20-97

Unknown repeaters list Is published this Issue

"Unknown" repeaters are classified by SERA as machines we have on our database, but have heard nothing - no communications of any kind for the past three years. We do not know if they are on the air or not.

Despite repeatedly asking and even begging all repeater owners to return their datasheets, a small number have seen fit to ignore our requests, repeatedly for the past 3 years or more.

These repeaters in the "unknown" category are in a special section of the Repeater Index this issue. Unless we hear from the repeater sponsor or owner prior to the May Journal deadline, the repeater will be dropped from our listing.

SERA coordinators will then continue to contact the repeater owner for information. If there still is no response, the coordinator will have to assume the person is no longer operating a repeater, and the frequency may begin going through the de-coordination process and ultimately be available for other coordination in the future.

SERA has repeatedly made it known that we MUST have accurate updated information on file for EVERY repeater, to assist us in make correct judgements in the coordination process.

Over 1,900 of the repeaters in SERA territory have responded. The fewer than 300 "unknown" repeater owners have continued to not cooperate, after numerous requests.

What is Interference-Free Operation on your Repeater Worth to You?

The SouthEast is fortunate. SERA came along just in time to take on the task of coordination. SERA enters its 26th year of successful keeper of the VHF/UHF frequency planning in the SouthEast. SERA is your Coordinator and is taking care of your repeater operation, day after day, year after year. Like anything else, this costs money.

If you think this is worth something. . .

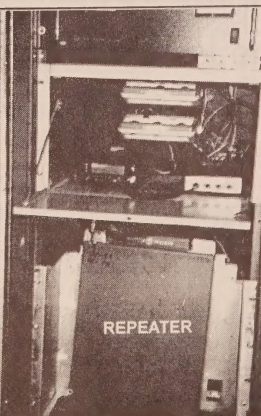

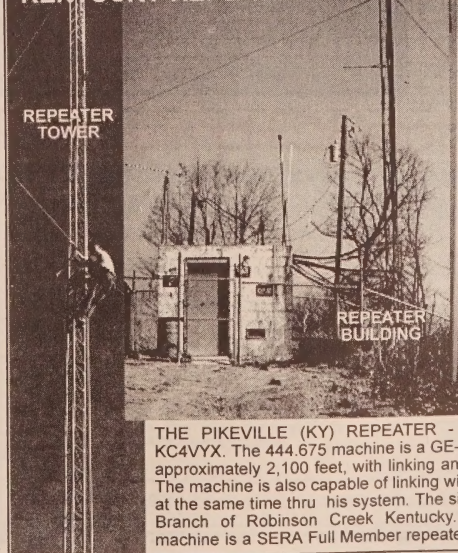

Invest just \$8.00

per year as an Associate Member of SERA.

Join SERA Now!

See Membership form in this issue.

KENTUCKY REPEATERS

Photos supplied by KC4VYX to Fred Jones, WA4SWF, SERA Journal.

THE PIKEVILLE (KY) REPEATER - Owned by Ronnie Thompson, KC4VYX. The 444.675 machine is a GE-Master II. The repeater antenna is approximately 2,100 feet, with linking antennas at the 2,000 level (AMSL). The machine is also capable of linking with as many as two other repeaters at the same time thru his system. The site is located at the head of Peters Branch of Robinson Creek Kentucky. The KC4VYX Robinson Creek machine is a SERA Full Member repeater.

Danielle Waller - Extra Class at 11

-by Patricia Hill, BARC Secretary

She started with her Technician license at 8-years-old. Danielle Waller, now 11, has passed her Extra Class test. Her new callsign is AE4XM.

The spry youngster is a proud member of the Briarpatch ARC of Galax, VA along with several other members of her family.

Danielle's father, Bobby is also an extra class, AC4SS her mother Katheleen, is technician class, KD4SPX. She has two sisters and two brothers-in-law who are technicians, and two aunts, one uncle and three cousins who are also licensed hams.

The Waller family feel like this is a good way to communicate with family and friends. It's also a good way to make new friends all over the world.

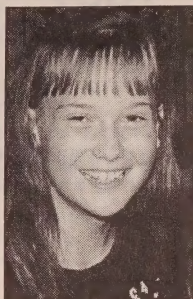

Danielle's next goal is to become a Volunteer Examiner. This will have to wait until she is 18-years-old, a VE requirement.

The Wallers are active members in the Briarpatch club, attending the regular meetings on the 4th Friday of the month at the Twin County Regional Hospital.

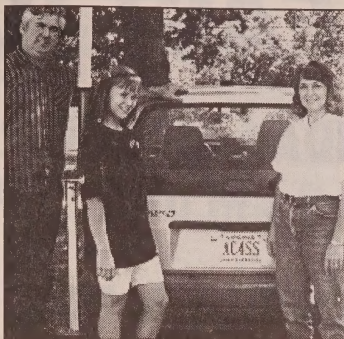

Chances are, persons attending the upcoming Elkin (NC) hamfest this month will get to see Danielle and members of her family, working with the club at the event.

The Briarpatch Club is proud of Danielle, their youngest member.

The Club was organized in June 1974, when the first meeting was held at Roy Wright's cabin atop Briarpatch Mt. Since then the club has grown with many new members. They participate

DANIELLE WALLER
AE4XM

Danielle Waller, AE4XM now Extra Class, poses with mom and dad, Bobby, AC4SS and Katheleen, KD4SPX. She is anxious to get on her dad's HF mobile rig, and try out that big BB-3 antenna he has mounted on the back.

in field day activities, operate a repeater, run the February Hamfest, participate in local and area Walk-A-Thons, picnics and Christmas gathering. Chances are there will be ample things for Danielle to participate in the Briarpatch club in the future.

New T-MARC Officers

- from Owen Wormser, K6LEW
President, T-MARC

At its annual meeting on Sunday 19 November 1996, The Middle Atlantic FM & Repeater Council (T-MARC) members elected the following persons to offices in the N.V.A, DE, MD, DC Coordinating Council:

Owen Wormser, K6LEW, President and Board Chairman.

Bill Conaway, W8HNT, Vice President Operations, Board member, Chm. Frequency Coordinating Committee.

Gary Hendrickson, W3DTN, Vice President Public Relations, Board member, Chm. OBC

John Hengen, K3HOI, Secretary, Treasurer, Board member

Bill Werner, W3EAO, Board of Directors member, Chm. Digital Committee

Sandy Sanders, WB5MMB, Board of Directors member

Larry D'Anna, WA3KOK, Board of Directors member

T-MARC officers and Board members can be contacted through the T-MARC Home Page at:

<<http://www.T-MARC.org>>.

ON THE COVER

Daniel Waller, is our cover celebrity this issue. See her story above.

She shares the spotlight with a young 2-year-old who is ready for ham radio anytime. Little David Shiplett, son of our SERA President Dave Shiplett, AC4MU as he was caught on camera at the recent SERA Board meeting. Dad says David has other things on his mind at the moment, but ham radio will probably be in the youngster's future a few years from now. Maybe he'll even be President of SERA 25 years from now. See family portrait elsewhere in this issue.

Will have 2-year terms

SERA Director & Vice-Director elections held

-by Wayne C. Williams, K4MOB. Editor

The SERA Director and Vice-Director elections involved 16 members of the Board of Directors. All-in-all, it was quite uneventful as most all returned to office.

Two replacements of resignations, one new appointment and one vice-director election was all that happened. Here is a breakdown by state of how the election process went:

GEORGIA - Stu Sims, N4MXC and Bert Coker, N4BZJ will return as Director and Vice-Director.

KENTUCKY - Upon the resignation of Jeff Martin, N5KOL last September, Mark Smith KM4IV was elevated to Director, and then elected to maintain that position in the upcoming term. The position of Vice-Director in

Kentucky is presently vacant.

MISSISSIPPI - Steve Grantham, N5DWU returns as Director of Mississippi. Upon the resignation of Jim Akers, W5VZF as Vice Director, that position remains vacant.

NORTH CAROLINA - Danny Hampton, K4ITL returns for another full term as Director of North Carolina. Lin Couch, K4OLC faced competition in an election within the district. Couch handily beat E. Kirk Ellis, KK4YP with a total of 74.8% of the eligible votes cast. Approximately 49% of eligible voters in North Carolina returned ballots.

SOUTH CAROLINA - Bill Jones, N4NMH returns as Director. Gary Foster, WD8OXE resigned as Vice Director and the position is open.

TENNESSEE - Johnny Wofford, WA4ETE, and Tim Berry, WB4GBI were returned as Director and Vice Director of Tennessee unopposed.

VIRGINIA - Former Director, Wally Burkett, WA4KXV announced his resignation effective the end of 1996. In his place, Don Williams, WA4K was elevated, then nominated and won as the new Virginia director. To fill the now vacant position of Vice-Director, Douglas A. Sharp, K2AD was nominated and elected.

WEST VIRGINIA - Dick Fowler, N8FMD and H. Alex Hedrick, Jr., N8FWL were returned, unopposed as Director and Vice Director respectively.

All will serve a two year term on the SERA Board of Directors.

A search is on to replace the missing Vice-Directors in 3 districts.

Doug Sharp, K2AD - New Virginia Vice-Director, No Stranger to coordination

(Editor's note: Since Doug, is our only newcomer to the Board, we thought a little information about him would be in order. Most other officials had biographies last issue.)

Virginia Vice-Director

Nostalgic wavelengths - by David Bower K4PZT

P.O. Box 10145, Knoxville, TN 37939 - Knoxville, TN E-Mail: D.bower@ieee.org

It Started as a classic - It remains a classic!

The great Astatic D-104 microphones are welcome additions to many amateur shacks.

It all starts with that device into which we speak.

Microphones come in many flavors with varying technical characteristics.

The miniature lavalier microphone of the newscaster seeks to blend with the clothing of the wearer, while attempting to capture the character of his voice.

A round-table or panel of presenters are often framed by a multitude of desk mounted microphones or, with a podium, are often grouped into constellations of "transducers" growing in magnitude with the importance of the speaker.

Amateur radio has its own uniqueness of character and technical quality enhanced to capture the "punch" of the voice to communicate efficiently the speech response of the ham while getting that "edge" to overcome QRM and noise. The mobile operator is at home with the simple push-to-talk microphone, designed for close-talk work to minimize background noise.

Some types, used in aircraft and other high noise environments, have acoustically designed cases with a "slot" to further reduce noise. Some operators speak directly into the microphone; others at an angle to capture,

perhaps, a better speech response devoid of acoustic air movement brought on by the "breathing" of the person. The "feel" of the push-to-talk button is important for comfort.

In the shack, it is different. The microphone frequently sets poised in front of the rig as an icon of communication. Size becomes less critical, so the acoustic design of the microphone is not restricted by size. The push-to-talk button or lever becomes a function of comfort and a locking mechanism is often desired for those long-winded QSOs.

A heavy base adds the security that the microphone and stand will stay put. Many designs have evolved over the years, but the Astatic D-104 has become a legend. And some might say: "legend within its own time" because it is still to be found in many shacks about the country.

It's a basic, classic design. The circular microphone component rests majestically atop a tall vertical column with adjacent, parallel push-to-talk bar that defies another more modern microphone to take its place. The microphone element hides behind a curved metal mesh screen into which many CQ's have fallen capture. The heavy base ensures it will stay in place. Some are chrome plated, others have a nice painted finish, while still others exhibit their "splendor" with a simulated gold finish.

Go to any large hamfest and you are

Just Got your License? Great!! - Here are a few hints to get going

-by Jack Wood, K14CB

Chances are, one of the first bands you decide to get on in your new found hobby of Amateur radio will be 2-meters, and above. So, I thought I would discuss repeaters.

The use of a repeater greatly increases the range of your radio by simultaneously retransmitting your signal from greater height and using greater power. Repeaters are able to do this by operating on a split frequency. The receive and transmit frequencies are separated by what is called the "offset." On the 2 meter band, the offset is 600 KHz, on 220 (1-1/4 Meters) it is 1.6 MHz., and on 70 cm it is 5 MHz.

It is important to realize that the repeater simply retransmits your signal. If you are noisy into the repeater, you will be noisy on the output.

Likewise, if you see a full scale reading on your radio from the repeater, remember, this is the signal strength of the repeater, and not that of the transmitting station you are listening to.

In setting up a repeater, an attempt is made to balance the transmit output power to the receiver sensitivity. Generally speaking, if you can hear the repeater clearly, you can get into it clearly with the average 50-watt transceiver and 5/8-wave mobile antenna. Use caution with a H/T. You may hear it well, but remember, you're operating extremely low power. If there is an imbalance between receiver and transmitter you may have an "alligator" - all mouth and no ears; or a "rabbit" all ears and no mouth.

When using an autopatch on a repeater, always make certain that your signal is clear (autopatch quality) because most of the people you contact on the autopatch are not used to radio and certainly not used to a noisy voice in their telephone.

To satisfy regulations, the repeater identify its call every ten minutes of operation. The regulations also require an automatic timeout after at least three minutes of continuous operation. The purpose of this is to shut off the repeater transmitter in case of an extraneous input signal continuously holding up the repeater. After three minutes of a continuous input signal the transmitter will time out and cease transmitting. It will stay in this condition until the input signal drops out. The timer will then reset and allow the transmitter to again function.

A repeater is designed for the transmitter to remain in constant operation as long as there is a break in the input signal at least every three minutes. It is not necessary to wait for the repeater transmitter to drop out between your transmissions. In a normal QSO, every time you release the mike, your squelch

tail causes the timer to reset to zero. On most machines, after you release your mike button, there is a courtesy beep. Generally the beep tells you the timer has reset. The pause and resulting beep also allows time for a breaker to enter the conversation if desired. Naturally, then, when talking on a repeater, wait for the courtesy beep before beginning your transmission, as the person who you are chatting with, waits after your transmission.

It is generally good practice to always identify your callsign anytime you use the repeater. simply kerchunking the machine without using your call is annoying to other people monitoring, and besides its against the rules.

When a repeater is inactive, and you want to start a conversation, it is acceptable to either call CQ, or just announce that you are monitoring the frequency for a call. Be sure to give your callsign.

If someone calls you and you miss his callsign, start the conversation, and when you get ready to turn it back to them, ask them to repeat their call for you.

Most repeater owners are very happy to have you use their machine. Do leave pauses between transmissions, and also be courteous and invite others to join, or use the repeater if they need it.

Breaking into a QSO is simple. when you hear one person release his microphone key, quickly announce your callsign. One or the other should acknowledge your presence, and invite you to join them.

Very importantly. always operate with the lowest power setting possible to get the job done. Especially in time of band openings, high power may mean that you will bring up distant repeaters on the same frequency and cause interference.

If you come on a repeater and make a call for a specific station. It is generally understood, that you are using the machine, until you announce clearing the frequency. So if the party you call, doesn't answer, courtesy dictates you put out a call "clearing the frequency." The term "negative contact" is tacky. Many just say "nothing heard" or "no contact" and clear.

The repeaters are there for our use. Owners and operators spend much time and money to see that they remain operational. Operating repeaters are fun and make the most out of our Amateur hobby.

If you have any questions as to the operation of any particular repeater, try to contact the owner, or a representative and ask. They will probably be more than happy to assist in any way possible.

An Open Letter to NC hams

I want to express my sincere appreciation for my overwhelming support by the voters in recent NC Vice Director election. I will continue to function in the Vice Director position fairly and unbiased, with reasonable response to all requests.

My goal is to follow the established Coordination Policies and Guidelines as closely as possible yet strive to act in the best interest of all those concerned.

Although I am primarily responsible for activities in western North Carolina, I want everyone to feel free to contact me concerning any action anywhere in the state. If I make a mistake - point it out to me. If you have a complaint, voice it to me with follow up copy to NC Director Danny Hampton, SERA VP Don Williams or SERA President David Shiplett.

I have stated MY intentions, now will you do YOUR part? We must have complete and accurate information in order to do our job. Inaccurate or missing information, although it may seem trivial to you, only results in delays and misunderstandings.

A friend of mine has a motto that I think is very appropriate: "Do it right, First Time, On Time, Every Time."

Thanks again for your continued support, I will do everything I can to earn it.

-Lin Couch K4OLC, Vice-Dir, NC

A Special Note From the President of SERA

The goal of all the volunteers of SERA is to do the best job we can for you, the repeater owners and repeater users in our territory. We are all like you, wanting what is best for our hobby. We want SERA to do the job right. We believe in quality, whether it is in service or in merely getting the latest information to you through our Repeater Journal.

Although we try very hard, sometimes things don't go quite right, either through lack of communications, or sometimes even a personality conflict and someone gets upset. I invite you to contact me if you have any complaints on the way SERA is doing its job. If you feel you need to talk to someone, please give me a call - I'll listen!

DAVE SHIPLETT, AC4MU

Our 31st year and still growing!

Hurricane Fran at the Port city

-by Glenn Cox KE4BMY

When hurricane Fran came ashore at Wilmington, NC, last September Bill Murrell AD4DN, A.R.E.S. emergency coordinator, and his wife Cathy, KD4WOF, had the people to provide communications for three shelters, one Red Cross center, the Wilmington E.O.C., and Skywarn weather service.

However as the storm moved through the area, and afterwards, relief was hard to come by. Some people already in place ended up pulling 30 hour shifts, until their shelter closed down, or some relief arrived to cover the portable packet station that Bill AD4DN had devised for each shelter.

These packet stations were are about the size of a foot locker, and are fast to set up. All they had to do was set them in place, and hook up. It is easier said than done when you had to set one in each shelter, the Red Cross, and the Wilmington E.O.C.

On the Skywarn side of A.R.E.S., communications were set up at the Wilmington weather service at New Hanover County airport by Rick Tharrington KD4JRX. via the 146.820 repeater. Weather statements as they were being issued by the Wilmington weather service were being sent to the Wilmington E.O.C., county E.O.Cs, such as Pender, Brunswick county, and Fayetteville E.O.C., as well as local volunteer fire departments who were fortunate to have ham operators as members.

The Wilmington weather service in turn, received real time reports from spotters, and hams, who confirmed weather conditions such as tornado sightings, hail, power outages, flooding, and let us not forget trees and the damages they caused.

You would be hard pressed in New Hanover County and, surrounding areas to hear a hurricane story that did not include something about trees.

Between hurricanes Bertha, and Fran some people did a fine job in getting everyone together and in place. I think they deserve our thanks.

Many of them are as follows: Bill Murrell - AD4DN - Emergency Coordinator A.R.E.S. Cathy Murrell - KD4WOF who after 30 plus hours could still be pleasant. Rick Tharrington - KD4JRX - Skywarn E.C. who helps make it tolerable in a tough situation. Jerry Tate - K4GMP- who keeps the 146.820 repeater running so smoothly.

I know there are others who unselfishly gave their time and talent to assist in this double tragedy in North Carolina. In due time I hope to meet them all and thank them, and I hope they all get due recognition for their efforts.

New ARRL Handbook Available; CD Coming

The American Radio Relay League reports that the new 1997 Handbook is available thru your local dealer or from head-quarters.

The new 1,200 page manual which amateurs rely on as the ultimate source for radio communications and electronics information is the standard in applied electronics and communications.

Free software is also included with the 1997 Handbook. On the disc you will find design and information software that enhances the value of the book, plus you can find QST Product reviews and many other information sources.

The ARRL is also announcing the 1997 Handbook is due out soon on CD which will offer many exciting new features and capabilities. Sounds from the audio clips section, bookmarks to return to topics most often used, print and save, and hypertext links and much more. For more information about the 1997 Handbook or the Handbook CD, contact ARRL, 225 Main St., Newington, CT. 06111, or see your favorite book dealer.

NFCC and ARRL Sign Mutual Agreement

The National Frequency Coordinators Conference, and the American Radio Relay League signed a Memorandum of Understanding officially on Friday Jan. 10.

The newly formed organization is comprised of Coordinators from around the country. One of their goals is to provide a unified voice of coordinators to the ARRL and to the FCC.

With the signing of the agreement, the NFCC can now officially begin. Assistance and an agreement with the League was greatly needed for the organization to get its start. The ARRL will provide suitable resources and support for the National Frequency coordinators Office, (NFCO) which will be the central location for the NFCC. The NFCO will also act as a day-to-day primary channel between the NFCC the FCC, and ARRL.

If Uncoord Flag shows in Your Repeater's listing - Contact your Coordinator

Every year, the February repeater lists have undergone a massive set of changes, a result of returned datasheets by repeater owners, listing changes

CORRESPONDENTS NEEDED

If you can write, and take pride in seeing your work in print, are consistent, dependable and want to promote the hams and clubs in your area, you could be what the Repeater Journal editor is looking for. We especially need state RJ correspondents from the states of South Carolina, Georgia, Mississippi. Also parts of Western Kentucky, and Western Virginia. If you would like to join the growing staff of the SERA Repeater Journal, contact the editor. He would like to talk to you. See Page 2 for name and address of the Journal editor.

they have made to their systems sometimes over the previous 12 months.

One set of changes, however, will cause an UNCOORD flag to be slapped on a repeater listing by our SERA computer system.

In a datasheet return, if a repeater owner changes parameters in the HAAT, antenna gain, or power figure, resulting in a situation that probably should have been re-coordinated by the local coordinator, the flag will fly.

If your system now has the Uncoord flag on it, contact your local coordinator immediately. He will see that corrections are made.

The stop measure is in place to allow coordinators to know immediately if anyone has moved a repeater or changed the ERP or pattern in such a way that would have required re-coordination. (Which of course, allows the coordinator to know exactly where the repeater is located now after the move,

or how much ERP does it have after that new antenna change or power change) Most repeater owners DO contact their director and get the simple paperwork change made.

The Directors make every effort to contact repeater owners in their state who have the flags flying, to find out just what has changed in their system and get it corrected and re-coordinated.

Sometimes, however, they cannot get to all of them. Sometimes, one will slip through the cracks, unfortunately.

The simplest remedy to get the correction taken care of is to contact your local coordinator (Director, Vice-Director or Assistant Director), handling your area of the state. He is the ONLY person who can authorize the database change on the computer.

Your patience, cooperation and support is appreciated.

SERA coordinating personnel listings by state are on Page 1 of this book.

Editorial Comment . . .

(Continued from Page 1)

Went to the cracker shelf. I wanted the same crackers I grew up eating. Those white square ones that fit so well together filled with peanut butter.

Guess what. Four different brand names covering 35 feet of shelves, all with similar boxes, and the word "saltines" almost identical. I searched for Nabisco saltines.

There they were . . . Nabisco Saltines, all five varieties. Finally, I guessed "ole Fashion," and when I got home and opened them, I was right. "Ole Fashion" is the kind I grew up with, and wanted.

There's another thing I don't want

you messing with. I have certain snacks I eat when I drive, and am on the road. I love em, and never change. My favorite is a corn snack called Bugles. They are shaped like little haystacks, and have a great salty, corn taste. Great for chomping on with an icky soft drink.

Anyway . . . went to super market the other day, grabbed a box for my trip. That weekend, when I got underway, I opened up a drink, poured it over ice, set the cup in my vehicle tray, and opened my Bugles and grabbed a handful, immediately tossing a couple in my watering mouth.

Ughhhhhhh! They tasted terrible. What is this? I looked at the box. Seemed ok . . . wait a minute? In type

above the Bugles logo - "Cheddar cheese." (I dang neigh ran off the road)

You're kidding! cheddar cheese Bugles. I checked the back of the box. Now Bugles come in 5 flavors including sour cream & onion. Dang!!!!!! They just couldn't leave a good thing alone. (more choices and more variety)

How about paint! We once were satisfied with outside white and inside white. Then came a few shades, green, blue, pink, tan. Today . . . noooooooo! We have over 25,000 colors to choose from. You can take a stick, a piece of cloth, or anything to a store. They can run it on a reflection computer and match it. This is great! Until you have to go back next year and do it all over again. Try matching again . . . friend.

More choices and more variety!

Are you beginning to get my point. Take Amateur radio equipment for instance. There are several brand names on the market for sale, and generally are represented at every hamfest and most stores. But the manufacturers in their desire to please you, are offering you "variety" and "more choices." There must be over 50 different 2-Meter handhelds on the market today, and another 50 2M mobiles; all from about 6 or 7 manufacturers.

I know! Let's start putting out radios in designer colors, offer more choices, more variety. How about rainbow colored LCD readouts, or those that change with the operators mood. Spotty and checkered pastel coordinated vinyl cases for the H/Ts. Little suits or ties for the rubber duckie. Offer extra outfits for your duck! One for every mood, or for every day of the week, or for any occasion. It's gotta sell!

More variety, more choices!

And antennas. If you don't like one 10 feet tall. No problem they come generally in about 15 different lengths and gains. The same goes for rubber ducks. From 1-inch to 4 feet, take your choice! No wonder the new young ham is totally lost! More variety, more choices.

Nothing is simple any more. We gotta have that variety and more choices.

No wonder more of us are having to stop and check the menu at McDonald's before we order. What was yesterday may be gone, and more new variety and choices added today.

Hummm . . . I wonder how many different ways a hamburger is available? Need to watch Dave's commercials more. A cheddar cheese, smokey country bacon, special bleu cheese sauced, 13/16ths pounder topped with tomatoe, lettuce, pickles, catsup, mustard, pickle relish, onion, diced carrots, sauteed mushroom with non-fat oily dressing, covered a with sourdough croissant bun, topped with finely selected sesame seeds and delivered to you hot and tangy on a bun-warming environmentally friendly carrier, with bio-degradable and recyclable elements. Want variety - now you can have it your way! (That is if you can ever decide what way you want it.)

-Wayne C. Williams, K4MOB, editor

W4CQ (The Other Guys) Proudly Announce our 5th Annual

Charlotte ARC Hamfest And Computer Fair

Note our new date!

June 8, 1997

8 am - til ?

At the

Roll-A-Round Skate Center

8830 East Harris Blvd. - Charlotte

Mark your calendar to come join us.

Our show is small enough for you to enjoy,
the atmosphere is excellent, we're laid-back and very friendly.
Come join all your area friends who will be there!

Dealers - Computers - Snacks
Food - Drink - Indoor A/C Building
Big Inside and Outside Flea Market

For advance information - tickets - tables - contact:

Proudly Sponsored The Charlotte Amateur Radio Club and the W4CQ 147.06 Repeater!

south carolina news lowcountry

-by ED FRANK, KC400Z,
(803) 871-4368 e-mail:
efrank@charleston.net
614 Longstreet Circle, Summerville, SC 29483

It has been very busy here in the Lowcountry. The South Carolina and Charleston area clubs have had several bad scares from Old Mother Nature, in which the local and state ARES nets were called up and everybody watched in anticipation as the storms went to the North of South Carolina, or out to sea. CARS put on the biggest hamfest ever, at Stall High school. It was a great success. The field day was set up on the Yorktown Museum in Charleston Harbor.

There were more points made than ever before, partly from the classes that were held to teach contest operation. In the "Backyard School House," there were 3 classes held for Technician class operator, one class for High speed CW 13 wpm and up, 70% passed, one Advanced Class, 80% passed, and several classes on How to do...?

CARS had a celebration for the 25th anniversary of the club. It was held at the Shrine Temple in Charleston and there were 110 people from all over the United States came to attend the party.

The Cooper River Bridge Run was the largest undertaking by the Amateur Radio community this year. We furnished the communications for coordination of 25,000 people doing the Run and Walk. It was great fun and a lot of work by a great many people.

There was a new repeater Shack put at the 145.250 Site near Summerville. We have Gained a lot of new Hams that are digging in and making the hobby more interesting. The Vanity call Sign System that everybody has been waiting for has been implemented. And Last but not least We have witnessed the passing of some very good friends Good

Emergency Trailer for the Greenwood (SC) ARS

Last issue we told of how the Greenwood (SC) ARS had obtained a trailer to place all their club equipment in. They sent us a picture of this handsome vehicle that any club would be proud to own. The 5x12-foot trailer stores the clubs emergency generator, radios, extension cords, portable lights and other things needed for an emergency. The trailer is parked under a shed with club access 24-hours a day at the Greenwood County EOC office.

-photo provided by Earle Gillian, K4VIA

Bless them, lets hope that they would approve of what we do with the Hobby in the future.

New ? Old ? After an eight year lapse, the Georgetown repeater is back on the air 147.375+. The antenna is at 250 feet up on the tower alongside the Sampit River bridge on Hwy. 17. The repeater is a Motorola Micor and carries the call K14CB. In use is a Tri-band antenna to accommodate linking. The plans are to install a 440 remote base tuned to the backbone repeater planned for Kingstree, which will serve this region of So. Carolina. The next step is to link to Myrtle Beach with 440 and later integrate these

machines into a regional linked system. Join us on the Georgetown repeater. Jack Wood MD K14CB.

And finally, on a personal note:

Very little is said about the huge amount of work and coordination it takes to keep the SERA organization running. With out them our communications would be chaos at the best. They keep the squabbles to a minimum and put out the best Repeater Journal in the USA. It is, complete, for our region, and is done by mostly volunteer labor. If you are not a member of SERA, you should be! Like the VE Exam system it would not be possible if you didn't help. Thanks, for a Job Well Done.

West Tennessee News - by Bob Gault, KD4NEC

221 Cedarwood Trail, Cleveland, TN 37312 - E-Mail: bgault@wingnet.net

Welcome to one of the new Tennessee news columns. It's been a while since Tennessee has had a regular column in the Journal, and Wayne Houser and I are excited about becoming correspondents for Tennessee. We also expect occasional help from Curtis Harbin of Jonesboro.

First let me introduce myself. I'm Bob Gault, and I've been a ham for five years. I'll cover everything south of I-40 and west of Nashville. Wayne is covering the area north of I-40 from Nashville east, which includes Knoxville and the Tri-Cities. So we will need your help.

We would suggest you add us to the mailing list of clubs who regularly publish a newsletter or you can send news by e-mail. I especially need help in west Tennessee, so anyone near Jackson or Memphis who can contribute club news please let me know.

I am an active member of the Cleveland Amateur Radio Club, and will serve as President during 1997. Previously I have served one term as vice president and two years as President. Getting into amateur radio was a natural, having spent more than 20 years as news director for WBAC (AM) and WALV (FM) in Cleveland. It's a job that keeps me on the go but has given me the experience to serve as a Journal correspondent.

As I said it's been a while since Tennessee was a regular feature in the Journal. I want to include as much as possible in each issue. So be sure and check out the next issue for more on Tennessee happenings.

My mailing address is 221 Cedarwood Trail, Cleveland, Tennessee 37312. E-mail can be sent to bgault@wingnet.net.

Construction is now underway in Cleveland on a state-of-the-art 911 center that will consolidate all emergency communications into a single facility. City and county police, fire and medical dispatching will be combined with offices of Bradley County's Emergency Management Agency and Emergency Operations Center. 911 Director Joe Wilson said the latest in computerized communications technology has been included in plans for the "model facility," which should be operational this summer. The new 911 center will have a larger dispatching center and E-O-C, which will be a direct benefit to amateur radio. We'll have an update in an upcoming issue of the Journal.

A judge in Bradley County, Tennessee agreed to dismiss charges placed against a man who was accused of recording his neighbors wireless phone conversations. An investigator on the case said the man had told people in the neighborhood that he had recorded their phone conversations. Several complained to authorities, and a search of his home reportedly turned up monitoring equipment and a number of cassette tapes. The law, which went into effect earlier in 1996, doesn't stop reception of wireless phone conversations but it does prohibit recording inter-

cepted messages and divulging their contents. Assistant District Attorney Carl Petty said after additional investigation, they plan to submit the case to a grand jury.

The annual Sequoyah Nuclear Power Plant and Olin Chemical Company drills involved amateur radio operators during November and December. The Sequoyah plant, owned by T-V-A and located near Saddy-Daisy Tennessee, conducts an annual test of their emergency response plan. RACES members in Hamilton and Bradley Counties participated in the exercise.

A few weeks later, RACES was involved in the annual drill at Olin Chemical Company in Charleston Tennessee, a manufacturer of swimming pool chemicals. Participants in Bradley and McMinn Counties took part in the two hour drill.

That's all for this issue. We hope to hear from you "west" Tennessee guys and gals.

East Tennessee News - by Wayne Houser KQ4EG

P.O. Box 9844, Knoxville, TN 37940 - E-Mail: whouser@knox.mindspring.com

I'm excited to see Tennessee back in the Repeater Journal for 1997. You will note, several of us Tennessee boys have decided to see that our state gets its share of news space in the Repeater Journal. Myself, Bob Gault, KD4NEC of Cleveland, and Curtis Harbin, AE4BT of Jonesboro hope to cover the entire state every quarter in the Journal. Each of us will take specific areas of the state and concentrate on our coverage.

As the year has already gotten off to a great start, I would like to take a moment to introduce myself. I got my first taste of radio back in 1963 in West Virginia. From that humble beginning, one might say I haven't been quite the same since then. (I know my wife would agree to that statement) Long winter nights so far this year have given me various opportunities to reflect back to those earlier years. I would stay up nights with nothing but an old Hallicrafters receiver listening to all the sounds of the world as they flooded every corner of my bedroom. Yes, even then I knew that radio would somehow play a great part in my life.

Amateur radio is truly the greatest hobby in the world today even though many changes have transpired since the 1960's. (Oops, I'm telling my age) There is something to do for everyone associated with this hobby. The spectrum ranges from VHF to HF with moonbounce and radios hooked to computers falling somewhere in between. Over

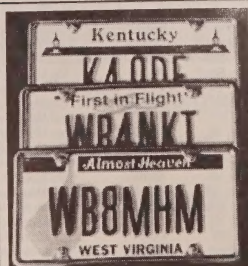

the years technology has drastically improved, giving us some of the best equipment on the market today.

As for myself, I somehow got side tracked back in those early years and found myself in the broadcasting industry where I stayed for fifteen years. Of course, after all those years, it was bound to happen. My love for Amateur Radio, (better known as "REAL RADIO") again surfaced and this time I went on to get my license.

I will be covering East and Middle Tennessee as a correspondent for the SERA Repeater Journal. The territory I intend to cover will be from Nashville to Knoxville up through the Tri-Cities area. Basically everything north of I-40 in Middle Tennessee and from Blount and Sevier county all the way to the Tennessee-Virginia border. For those of you in the Tri-Cities area, I certainly encourage you to get in touch with Curtis Harbin (AE4BT) on anything of interest for the Tennessee news column. He will relate those stories to me and we will make that information available for the Repeater Journal. Curtis Harbin's address is: 134 Evergreen Road, Jonesboro, TN 37659.

Please support your Repeater Journal with as much newsworthy material as you can possibly supply. We want you to tell your friends that there is a new source of news for Tennessee, starting right now. They need to

REPEATERS LIST - STATUS UNKNOWN

PLEASE NOTE

SERA policies state that we will publish a listing of all known repeaters in the SERA 8-state territory. Repeater lists below have not returned a completed SERA Datasheet in the last three years or more, which according to our printed policy, indicates that they may no longer be in existence. (Their status of operation is unknown). If a completed datasheet is not received by the next publication deadline of April 15, 1997, these repeaters will no longer appear in SERA listings. Coordinators will then may follow SERA policy and guidelines which may ultimately result in the deordinating of these unknown repeaters and making the frequencies available for reassignment. Complete accuracy and locations of all repeaters is a must requirement for good interference free coordination. That is our justification for this action. We only ask for your help for your own good. If your repeater appears in the list below, your cooperation in returning a datasheet is needed immediately. If you are a user of a repeater listed below, please notify the repeater owner of the urgency of the situation. The datasheet is the only approved document for such notification. If you need a datasheet package, contact SERA at:

PO Box 215, Tobaccoville, NC 27050-0215 -
or send a note by email to: dward@vnet.net.

A few Good Men Needed in Mississippi And in Kentucky

SERA Mississippi Director Steve Grantham, N5DWU, and Kentucky Director Mark Smith, KM4IV told the Repeater Journal that they are both looking for some additional help in coordination personnel in both Kentucky and Mississippi.

"We have things under control here, but I need a little help in outer regions away from my area," Grantham said.

Smith said his state is divided by mountainous terrain, and he badly needs help in the Western part of the State to keep him abreast of happenings of repeaters and users.

Presently there is are openings for Vice-Director (which is an elected office, and requires applicant to be a SERA Full Member), for both states.

Several Assistant Directors, are also needed in the Northern, Central and Southern areas of Mississippi.

Smith said aside from a Vice Director, he needed someone from the Western part of Kentucky in the Assistant Director position too.

The Assistant Director positions are appointments made by the Director, and approved by the full SERA Board. Assistant Directors are the eyes and ears of the Director and perform many valuable duties in the area of coordination and assistance that SERA provides repeater owners.

Any persons who would like to help in any of these challenging and rewarding positions should contact Steve for MS and Mark for KY direct. Their address, phone and e-mail information is on Page 1.

FAR Scholarships

The Foundation For Amateur Radio, Inc., a non-profit organization with headquarters in Washington, DC, plans to administer 60 scholarships for the academic year 1997-1998 to assist licensed Radio Amateurs. The Foundation, is composed of over 75 local area clubs around the DC area.

Licensed hams may compete for these awards if they plan to pursue a full-time course of studies beyond high school and are enrolls in or have been accepted for enrollment at an accredited university, college or technical school. The awards range from \$500 to \$2,500, with preference given in some cases to residents of specified geographical areas or the pursuit of certain study program. Additional information and an application form may be requested postmarked prior to April 30 from: FAR Scholarships, 6903 Rhode Island Ave., College Park, MD 20740.

Public Spirited Clubs Help SERA at Hamfests

SERA officials are most grateful for the outstanding help and assistance given us during several recent Hamfests. We have been trying out a new membership promotion involving hamfest sponsors. They were asked to pass out brochures to patrons, and have a table to collect SERA memberships which come in during the show. Our thanks to these who have responded and helped since we started:

VIRGINIA BEACH ARC of Virginia Beach, VA at the Virginia Beach Hamfest, Sept. 1996

JOHNSTON ARS of Benson, NC, at the Benson JARSFEST 96 in November, 1996.

76 GROUP of Greensboro, NC, at the Greater Greensboro Hamfest in December 1996.

RICHMOND AMATEUR TELE-COMMUNICATIONS SOCIETY (RATS) of Richmond, VA, at the Richmond Frostfest in January 1997.

As the year progresses, we may be asking other hamfest sponsoring clubs for their help. We hope they will respond as these clubs have done. We are working on club memberships at club meetings, with cash incentives for the club treasury.

An Important Message from Williams Radio (Accessories)

PAID ADVERTISEMENT

To: Our many Customers and Friends:

From: Wayne Williams, K4MOB & Gerry Williams, KB4SEL

Times change! Things change! We all Change.

We would like to announce a few changes in our business. We have re-directed our focus in the Amateur industry, and decided to "downsize" Williams Radio Sales to a point where I can handle it alone, now being retired, and provide the attention I still feel my customers need, yet still make a profit that will justify continuing doing business.

Effective immediately, Williams Radio no longer is a dealer, distributor or source of information for any new Amateur radio transceivers or H/Ts. We reluctantly decided this was the best way for us to direct our future.

We will continue to concentrate our effort on other items that hams will need in the future. Items you may not readily find just anywhere.

Our two main features will be Replacement Batteries, and Larsen Antennas. Thanks to you, Batteries are beginning to do very well for us and we're happy to say, that Larsen after 23 years, continues to be our mainstay antenna product.

We will also carry selected sizes of power supplies and some other accessories for radio handhelds and transceivers. Our search begins immediately to seek out those items you need, yet cannot always find. That is our plan for the future. Radio transceiver products just don't have a place with us anymore, neither do books which we also eliminated last year.

One thing has never changed, and never will change. Williams Radio continues to be totally dedicated, as we have for 23 years to pleasing you the customer. We may not always have the very best price you can find anywhere, but you won't find any better service or know-how and overall well feeling after buying from us.

And finally, we're slightly adjusting our name. The old Williams Radio name will stick, but we'll drop the word sales and add the word accessories.

We will continue the hamfest circuit in the Southeast in 1997 - please stop by and see us and allow us to shake your hand! The booth will be smaller, but our smile, a little older, but wiser, will still be there. Thank you for 23 years of faithful patronage. It has been our distinct pleasure to serve you. May Williams Radio Accessories continue to serve you in some capacity?

Ted

Ted Wolfe became a Silent Key on December 9th. His voice may not be heard but I pray that his hopes and ideals concerning amateur radio will long live in our hearts and actions.

Ted was among the first to welcome me (a Gabby, Gabby, Granny) to 2-meter communications. We spent many enjoyable hours discussing almost everything... favorite authors; music likes and dislikes; hobbies; foods; weather, etc. The Bolt Mountain 145.170 repeater was a grand place to congregate late at night and many did.

Ted became our "Uncle Elmer" offering advice and sharing his wisdom with us... a scattered group of new hams. With gentleness he directed our operating procedures - correcting our mistakes by setting a good example himself. He led discussions about the early days of radio and gave us his visions of what could be the future.

We never had the opportunity to get together and visit, except via radio. But perhaps for me that was the best way to meet... I learned to listen with my heart as well as my mind. With my knowledge I found a deep and abiding respect for Ted Wolfe and his personification of a gentleman and a friend. I will miss him!

To his family and personal friends, we extend our sympathy. To his fellow amateurs we extend this challenge:

Help keep this column alive as a tribute to Ted and his dedication to our hobby.

TONE ACCESSING is slowly but surely arriving in West Virginia. With the amount of interference flooding the two-meter spectrum, repeater owners are forced to use PL tone access to protect their machines. This does not mean they are closing the repeaters, but are limiting the wear and tear on the equipment. Repeaters are quite expensive and the constant activation soon wears out the machine.

The Appalachian Repeater Association's sponsored repeaters are using a 100.0 Hz PL tone as access. This tone will be used on all two meter and 440 machines. By the way, the ARA has received a new club call sign - W8ARA. There will be a change of calls on several of the repeaters also. WF1G is now WV8B and Gary Holt's call will identify the 146.625, 145.170, 444.400 and 444.800 machines.

AA8BS is changed to W8LG and Greg Sluss' call will be heard on the 442.300 and 444.125. The 444.125 repeater has been relocated, moving fifty miles northeast from its Wyoming County site to the Fire Tower at Mann Mountain, Layland, Fayette County.

Other repeaters now using the 100.0 Hz tone are 146.730, WB8SPW, Alderson; 147.390, WV8D, Lewisburg, and 145.410, KB8CM, Union.

The Ham Talk Link repeaters are accessible with the 103.5 Hz. tone. Where we live in Southern West Virginia, we have a problem of activating several machines using the same frequency. An example is 147.135, located at Davis, WV and another in Giles County, VA. We can now use both because Tom Mallory N4AZJ decided on the 100.0 tone instead of the 103.5.

Thanks, Tom, because we surely do enjoy

your repeater.

The opposite is true with the 145.130 repeaters at Glenville, WV and Galax, VA. They both use the 103.5 Hz tone and therefore we can use neither. Oh well, that's another reason we are thankful for the PCRN-ARA system. If we need to talk to North Carolina, we just activate the link. I love two meters.

Before I forget, WJ8G - J.R. called my attention to the time change for the multi county A.R.E.S. net which is held each Thursday on the Ham Talk Link System. He noted that we spring forward to 9 P.M. and fall back to 8 P.M. when we change our clocks each year.

TWO NEW - TWO MOVED — Alex Hedrick, N8FWL, SERA Secretary and WV Vice-Director, sent me notices of his activities in the recent months. These included a new repeater constructed by Jimmie L. Mangus Jr. WB8YST of Charleston, WV. The six-meter machine was granted coordination on 52.710 / 53.710 frequency and is located on Little Beech Knob, south - southwest of Richwood in Nicholas County. An access tone of 107.2 Hz is needed.

The other new machine, granted for 449.900 / 444.900 frequency, is located on the Upper Whitman strip job, south - southwest of Logan in Logan County. The trustee is KE4QOX John Abram of High Point, NC.

An existing repeater on 444.275 has been re-coordinated for 449.225 / 444.225 Mhz with David Comstock W8HYX as the trustee for the machine sponsored by West Virginia Amateur Radio Inc. A PL tone of 123.0 Hz will allow access to this Charleston repeater.

The construction of a new Federal Building in Beckley has forced the moving of the 145.370 repeater. Sponsored by the Black Diamond ARC, Marvin Brown N8TNB is trustee. This machine originally located in the City Police Department's building in October 1981, and now fifteen years later has been moved along with the police and emergency services radios .64 miles from its original location.

D.A.R.E.N. - I was really fascinated with the information packet I received from the Wood County Emergency Services office. The monthly news bulletins are filled with valuable facts and interesting stories.

A booklet explaining the Digital Amateur Radio Emergency Network was included. Our son Kevin N8KEE said it described this packet network so clearly that even a computer dummy like me could understand it's basics. (I didn't, but that is because I am terrified of a computer.)

The Wood County R.A.C.E.S. net is called each Sunday at 8:30 P.M. on the 147.255 repeater followed by the Wood County Amateur Radio Net. For more information about the various activities of this group contact Duane Jones N8LDM; Wood County Emergency Services; 1810 Staunton Ave.; Parkersburg, WV 26101.

Triple States Radio Amateur Club members have honored me with membership and I thank them. I have received a very full package of materials from the secretary, Ralph McDonough K8AN, along with a lovely letter of congratulations. Thanks, R. Ralph.

West Virginia News Continues

This club is the largest such organization in WV and can boast of memberships in all 50 states and 3 foreign countries. The members sponsor the Wheeling Hamfest, which will be held at Wheeling Park this year on Sept. 14th.

The club also maintains two repeaters - 146.715 KB8GL at Sherrard and 146.910 - KC8CS at McMechen. This last repeater is home for a WX Net on Tuesdays at 8:15 P.M. and a Friday A.R. News Net at 9:00 P.M. (If I lived closer so I could participate in this group.)

AFTER THE HOLIDAYS, we eagerly look forward to the Fayetteville Hamfest, sponsored by the Plateau ARC. Held on the last Sunday of February, this has become a big family reunion for us. We get to meet those new Hams we have enjoyed talking with all year and renew old friendships with those we have met before.

This years event is scheduled to open at 9 A.M. on February 23 at the Fayetteville High School Gym. W5YI walk-in exams; various dealers; flea market and craft tables, and a great concessions stand are always featured. (Stop by the ARA - SERA tables and say Hello. Just remember, I don't shake hands, I collect HUGS!)

PARC members have elected Richard Roy KB8SMC as their new president to be assisted by Ronnie Gray KC8SF, vice president; Juddie Burgess KC8HON, secretary; Connie Skaggs N8XNC, treasurer, and trustees: Steve White NM8T, Charlie Byrd N8ZJA, Thurmond Byrd KB8NEB and Mike Burns KG8NV.

CONGRATULATIONS - The Kanawha

Amateur Radio Club in Charleston has been appointed as a Special Service Club by ARRL. This designation was awarded because of the members involvement in emergency communications programs and participation in A.R.E.S.

Community involvement, technical education classes and new Ham recruitment and training were other areas considered when judging the club. Founded in 1949, the KARC currently has a membership of 175.

The 1997 officers will be President Mac McMillion WD8OZT, Vice President Bill Edele KB8QQB, Secretary Ann Rinehart KA8ZGY, Treasurer Bill Hunter K8BS, Publicity Director Jim Damron N8TMW and Program Director Brad Young N8UEP.

N8TMW and Jeanie Holstein KB8QLC are co-chairing the preparations for the 13th Annual Charleston Area Hamfest and Computer Show, scheduled from 8:30 A.M. to 3 P.M. March 16th. The Charleston Civic Center is home to this giant flea market of new and used radio and computer equipment.

My name has been added to the mailing list for the newsletters and I appreciate receiving the copy of the 1996 Membership Directory. It will come in handy if I need to contact Kanawha Valley Hams during emergencies. Thanks, Jim.

VIRGINIA - Members of the Giles Amateur Radio Association should be patting each other's backs. I received the winter edition of the quarterly newsletter and was very impressed with what KF4JBR Markus Smith has created. This club has a very active membership and helps maintain the following repeaters on Dismal Peak: 147.135 (100.0 Hz PL) and 444.975 (103.5 Hz PL) both identified with N4AZJ Tom Mallory's call; 224.86 Mark Williams KJ4QQ, and 53.470 (146.2 Hz

PI) belonging to David Arrington KE4JYN. There are also three packet nodes on the mountain, one of which is a D.A.R.E.N., connected to the state-wide system established in West Virginia.

Also noted in the newsletter was the naming of the Giles County Emergency coordinator for A.R.E.S. - Dennis Schelor N8OVH with Les Sears KE4HYE as an assistant.

SNAKES ALIVE - A routine chore like mowing grass can sometimes turn into a heart thumping experience. Just ask KE4JYN? Dave was mowing the grass around his home in the town of Narrows, VA when he rode under a tree.

Thump...bump... to his surprise he had a hitch-hiker. A snake was slithering and sliding on the hood of the mower. He stopped the machine, removed the critter and waited until his heart beat a little slower. He resumed mowing, again passing under that same tree. Bingo, you guessed it! Another snake fell.

In lieu of cutting down the trees, David, may we suggest you rig a "Snake Shade" over your head before mowing season returns?

Tim Ford KC8IT went alone on Herndon Mountain in Wyoming County to work on his repeaters 147.030 and 145.090 packet node. He removed the cabinet cover and spotting the problem, went to his tool box for the necessary equipment. When he reached back toward the repeater's inner workings he was startled by the beady eyes of a copperhead looking back at him.

SCORE : Tim = 1; Snake = 0.

This is only one of the many scary creature tales I have heard from our repeater technicians. Those of us who enjoy the comforts of our home stations should maybe say "Thank You" more often. Support your favorite repeater.

-Hugs . . . Barbara

Who's On First ?

The other day, I decided to use a 2M frequency to get my cousin who travels in North Carolina once every few years. You remember the classic, "Who's on First?" joke. I felt like Abbott and Costello. This has been my experience on a wide-area coverage repeater. A crazy nowhere circle of frustration in trying to call but not getting my cousin but the Repeater King.

You know him (or her), I bet. The one who thinks he owns a frequency and who you must go through in order to talk to anyone. Well, you will see what I mean.

Here is an unreasonable facsimile of what happened:

"N2VRF, N2VRF. This is KR4LS." (Sounds pretty clear, huh? I was definite about who I was calling. Right ?)

Then, I heard, "KR4LS, KR4LS. This is KB10DUH. Woo yew cawlin'?"

(Internal scream in my mind. Why, why, WHY did I think that I could get on the public airwaves, call my station without the Repeater King coming on? Will I ever learn to not get on THIS repeater?)

"KB10DUH, this is KR4LS (I am going to be nice) I was calling N2VRF." (Didn't he hear me call N3VRF!?!?)

"Kin I hep yew ? Whutchev wont 'em for?"

(Do what? Asking me what I want MY station for? Who made him king of the repeater? NO, this HAM is not being friendly or helpful. This one is Nooooo-se-y. Honey, this HAM is so nosey that people tell him that he better get that Kosher Dill off of his face. One time, he fell asleep and got taken to a picnic as part of a potato salad. In fact, I saw him at Benson with mustard all over his face.)

"I just would like to call my station once more, if you don't mind. Or, am I tying up the frequency for you?" (I couldn't resist. What do you want to bet that he doesn't get it?)

"Naah. Ah ain't got nuthin' ta dew. Ah jes' wont to hep yew get yore station."

(I win. He didn't get it. He really thinks it is HIS frequency and I am going to talk on HIS frequency and tie it up.)

"Thank you, I'm sure. KR4LS." (Has it been 10 minutes? 20 minutes ? 10 days that I have been trapped with this exemplar of asynchronous absolute axiomatic amateurism ? This hoopah of HT?)

"Say yew are mighty light into the repeater, there, Miss Cindy".

(See, my next bet with you, Dear Reader, is that he would say this. Now he has done it. Called me MISS Cindy AND given me that tired old male line about being "light in to the repeater". If one more man tells one more lady HAM that she is "light into the repeater", I am going to bop one of them over the head with the mag end of an large CB antenna. It seems a put down sometimes.

I have never yet heard a woman really "light" as a men claim. Now, I have heard men light into a repeater. Well, static and men. Not the same thing? Same thing ? Ah, enough. These men need to find something else to fuss about. And they need to fuss OFF the air about their wife's radiomanship. One should never embarrass one's spouse on the air. If a wife is, indeed, "light", then the husband should offer to help her OFF the air instead of talking with her on the radio for 10 minutes then suddenly announcing her audio is inadequate.

Especially when she has not been told that in the hour previous that she has been on and off talking and conditions have not changed. I am no longer surprised when a woman quits the radio. I am just not. I wonder why some HAMs want their wife on the radio at all. With some all I hear is for the wife to check

CAT-300 Repeater Controller

Attention Repeater Owners

Finally a repeater controller with a TI voice synthesizer and full feature autopatch incredibly priced at \$299.00.

Features Include:

- ✓ Voice Synthesizer
- ✓ (412) Word Vocabulary
- ✓ Twelve Voice Messages
- ✓ Two Voice Identifiers
- ✓ CW Identifier
- ✓ Full Feature Autopatch
- ✓ User Speed Dials
- ✓ Emergency Speed Dials
- ✓ Reverse Autopatch
- ✓ DTMF Key Pad Test
- ✓ DTMF Repeater Access
- ✓ DTMF Repeater Muting
- ✓ (56) Control Functions
- ✓ Remote Control Switches
- ✓ Hardware Logic Inputs
- ✓ DVR Controller Ready *
- ✓ Female Voice & Sound Effects
- ✓ Programmable Courtesy Tones
- ✓ Programmable Codes and Timers

* (Requires MF-1000 Serial Interface Card \$59.00)

Write or Call for a brochure describing the CAT-300 Controller, including schematic, voice word list, and control functions.

CLEAR, CRISP, & STRONG REPEAT AUDIO!

C3I_® HAS RELEASED SEVERAL NEW PRODUCTS AND IS SETTING THE NEW STANDARD IN AUDIO PROCESSING TECHNOLOGY

- OUR NEW C3I-100PG, WITH PATENT-PENDING AGC, WILL MAKE ALL YOUR USERS VERY PLEASED. ELIMINATE WEAK AUDIO, STOP "PICKED FENCING", BRING EVERYONE USING YOUR REPEATER UP TO FULL QUIETING WITHOUT RAISING YOUR NOISE FLOOR OR HEARING THE PUMPING ACTION ASSOCIATED WITH ALL OTHER AGC CIRCUITS. THIS NEW PRODUCT IS OUR HOTTEST SELLER, 100s ARE NOW IN USE, CALL FOR FURTHER DETAILS. THIS IS AN AUDIO PROCESSOR AS WELL, SIMILAR TO OUR STANDARD PRODUCT, THE C3I-1000P.
- OUR NEW C3I-1000TT, IS A PANEL-MOUNT, 16 BUTTON MATRIX, SELECTABLE LOGIC, DTMF PAD, WITH FULL CONTROL OVER AUDIO LEVEL AND TIMING. WORKS PERFECTLY WITH THOSE CONTROLS THAT DEMAND PRESENCE OF COS BEFORE DECODING. NOW YOU WON'T HAVE TO USE A FAKE DTMF TO SIMULATE COS BEING PRESENT.
- ARE YOU TIRED OF LISTENING TO USER SQUELCH TAILS? GET RID OF THEM WITH OUR C3I-1000D, AUDIO DELAY MODULE.
- SOON-TO-BE-RELEASED: THE C3I-1000DVR, DIGITAL VOICE RECORDER; AND, OUR C3I-1000SQ, SIGNAL QUALITY VERIFIER. DETAILS WILL FOLLOW.
- YOUR CONTROLLER WILL INSTALL WITH EASE IN OUR CUSTOM FABRICATED RM-1000 EMI ENCLOSURE, COMPLETE WITH POWER SUPPLY AND SPACE FOR OTHER OPTIONS. THE RM-1000 IS AVAILABLE NOW FOR YOUR CAT-300, 500 AND CAT-1000 REPEATER CONTROLLERS, OR ANY OTHER CONTROLLER MOTHERBOARD!
- OUR RELATIONSHIP WITH COMPUTER AUTOMATION TECHNOLOGIES, THE CAT-300, 500 & 1000 PEOPLE, ALLOWS US TO FULLY INTEGRATE YOUR NEW CONTROLLER INTO OUR ENCLOSURE, ADDING C3I_® OPTIONS, AND FULLY TESTING YOUR CONTROLLER BEFORE DELIVERY.
- LET US HELP YOU REACH TOP PERFORMANCE! CALL OR WRITE TODAY FOR YOUR FREE INFORMATION KIT ON ALL C3I_® PRODUCTS TO INCLUDE OUR LOW NOISE / HIGH REJECTION RF PRESELECTORS, REPEATER REMOTES & OTHER AUDIO PRODUCTS.

Can Amateur Radio Survive the Internet?

-by Ray Adams W4CPA (ex N4BAQ)

Over the last decade or so, the FCC has made several changes in Part 97 of their rules that governs the amateur radio service with the announced intention of keeping the service alive and well. They know full well the value hams have been to America in uncounted emergency situations throughout several decades of existence.

The War!

Not to be overlooked in this perspective was the call to arms, complete with operating equipment in hand, following the travesty of Pearl Harbor in 1941.

By executive order, President Franklin D. Roosevelt ordered amateur radio off the air. About all that was known was that we were in for the fight of our very lives with absolutely no holds barred - the military simply drafted any licensed ham that passed the physical! That subjected the now military radio operators to far greater disciplinary direction than would have ever been tolerated by a civilian operator.

Much of the equipment in use by amateur radio operators in late 1941 was simply confiscated for the amateur turned soldier to operate.

Public Service in Emergencies

Recently in today's world, even the news media credited amateur radio for its spontaneous aid in severe weather conditions in the Northeastern United States. The "blizzard of 93" that blanketed most of the eastern United States with two feet plus of snow caused one of my closest friends to spend 92 consecutive hours at the RACES/ARES operating station in a subbasement of Knoxville, TN's City-County building. I opened my own garage door looking into a 42" accumulation.

In our area, the call went out for amateurs that could bring a radio and magnetic mount antenna to report to a certain public building's parking lot where they were put in vehicles needing communications on a basis of priority assigned by TEMA. Transportation to that parking lot was furnished for those that needed it. It really didn't matter whether the ham could supply 2 meter, 220 MHz or 440 MHz equipment, as the EOC was operating on all three bands, switching from one [usually privately owned] repeater to another as they too, fell victim to the outrageous ravages of winter weather. The apparent oversupply of amateur radio repeaters during normal times was the salvaging factor that kept even that system of last resort operational.

The typical amateur, like typical citizen, WILL be there when they are truly needed in a particularly unexpected crisis, and they have the capability

of providing relief, especially if there is no alternative to their support. Of the people involved in that emergency work, virtually all got into the fraternity of amateur radio strictly for the fun of it. The "oversupply" of repeaters were put in service, in many cases, not because they were needed for the pleasures of operating through a repeater, which was the primary motivating force behind many an entry to amateur radio. The motivation has now, in many cases, advanced to cause the ham to want to experience the OPERATION of a repeater itself.

Should the unexpected emergency arrive, the hams who can assist at the time of need literally pour out of the woodwork ready to go with little, and in many cases no, advance notice whatsoever. Those who can't actually help, respect the need for the repeater equipment and [hopefully] shut up. The answer to the unnecessary question of the repeater's availability for purposes of handling the unexpected anomaly is invariably a resounding "YES!"

I go to the above detail of scenarios to delineate that the capability of assistance by amateur radio is not born with community service first in mind. It is born as a hobby. Something that is fun to do and causes the participant to meet many others of similar interests, some of which will become lifelong friends, often physically separated by even thousands of miles and sometimes national borders. They come from all walks of life, all occupations, and all educational levels - in other words they are a true cross section of the population from which they voluntarily emerge, thus it is not abnormal to have the exact expertise needed at the time the unexpected bounces up needing to be handled.

That expertise invariably will introduce itself with performance when the need arises. Because this [even repeater operation] is a fun thing to do, the equipment will normally be very carefully kept at its peak operating condition, a fact that cannot be said about public financed emergency equipment that must tolerate budgetary provisions, even for routine maintenance, which may or may not get done at the recommended intervals based on either passage of time or hours of usage. Additionally, although governmental agencies invariably have their own two way radio systems, their licenses limit them to their very own exclusive channels. The other agencies have similar limitations on their radio licenses, thus they cannot communicate directly with each other. By putting a ham with each, that problem disappears and many times a situation that would otherwise be clumsy to coordinate becomes

so routine it resembles an old hat. Ham radio can and does contribute where no other service may legally tread.

The Amateur VEC System

I have been involved in the VEC program since its inception in 1984, serving the Western Carolina Amateur Radio Society/VEC, Inc. (WCARS/VEC) as both Prime FCC Contact person and Treasurer.

The FCC's new computer system decimated the waiting time for operating authority following successfully passing the appropriate examination with two factors. The first was a rules modification extending the individual operating authority based on the license existing in the FCC's database, complete with an 800# to make the contents of that database available to the general public during business hours. Couple that with digital access to the database offered by several WWW sites, including the FCC's very own site posting files of daily grants, and it becomes as readily available as correct time. Physical possession of at least a copy of the license is no longer needed to legally operate.

The other item is, of course, electronic filing of the test data generated in the Volunteer Examiner program. The FCC forgot to tell the automated system there is such a thing as a weekend or holiday, so it [hopefully] operates on a daily basis, granting licenses based on that day's incoming data that is in fact in perfect electronic form each 9:00 pm EST. The file of grants so made is then posted on the WWW at 3:57 am, available for immediate FTP retrieval. We even have volunteers waiting for that posting with their search file of examinees EFiled that day already compiled. All they need add is the call sign and it is E-Mailed back to the VEs that administered the session, many times before dawn! It is not at all unusual to have a licensee legally on the air as quickly as the day after the examination session at which the person qualified for the privilege. NEAT!

The entire licensing program is now quite a rapidly paced activity. WCARS/VEC is the only VEC that uses more than one point of input for test activity from the VEC to the FCC.

WCARS/VEC has corporate officers authorized to electronically file test results directly into the FCC's automated system living and functioning in Greenville, SC, Asheville, NC [where it originated] Memphis, TN, and of course, I am in Knoxville, TN.

It is now routine for many a newcomer to be on the air before the test report and the accompanying examination fees can find their way to me by US Mail! We don't keep statistical summaries or any other unnecessary paperwork in WCARS/VEC, priding ourselves in providing the maximum service to the communities in which we

(Continued on Page 45)

Can HR Survive the Internet?

(Continued from Page 44)

are privileged to operate with an absolute minimum of.

A Dropoff of examinees is noted

As WCARS/VEC's treasurer, I had noticed a drop in revenues, and had commented to the other officers that our activity was down in 1996 as compared to 1995 and previous years although I was not aware of anything we could recognize as a mistake in management and did not think we had lost any VE teams, or even had any test schedules relaxed. Just about the time I was ready to actually post the books of account up to date and compare revenue collections, that Friendly Candy Company in fact managed to furnish statistics of the entire VEC program by month for both 1995 and to date 1996.

As we write this, December 1996 is not only partially complete so far as the calendar is concerned, Those statistics, summarized for January through November for 1995 and 1996 show the following totals:

	SESSIONS	EXAMINEES
1995	10,414	96,845
1996	9,918	75,012
DECR[in #]	496	21,833
DECR[in %]	4.76%	22.54%

So it is not just WCARS/VEC but the entire VE program that is exhibiting relaxed activity in 1996 as compared to 1995!

The nominal drop in the number of sessions could easily be attributed to the lessening of interest in the fraternity in general, and the related drop in the number of unscheduled sessions that routinely serve as commencement for classes, etc. The average VE test session size is down from 10-11 examinees a few years ago to 8.8429 in January 1995 and to 6.9444 in December 1996. I see no reason that statistic should not be representative in December 1996 even in a partially reported situation, as we do have the necessary basis to calculate an average for those sessions. The average session size for the first eleven months of 1995 was 9.2995 and 7.5632 for that same time frame in 1996 that was included in

the count as made.

Is Interest in the hobby waning?

The bottom line is that interest in amateur radio has waned.

Its greatest weakness has always been that amateur radio has failed to retain those it attracted. Now it is failing to attract, and that is a very serious matter indeed, even showing through to the attendance of every hamfest I know.

What's the problem?

With America in the lead and the world following, sometimes quite closely behind, technology has been advancing beyond anyone's imagination for yea these many years. In 1959 I saw a company spend two and a quarter million dollars on a computer installation, using two full floors of a downtown office building totally remodelled to resemble today's "clean room" including total and continuously precise control of not only temperature [no sunlight permitted to distort the precision of temperature control] but humidity, atmospheric contamination [dust, etc] as well. Today I have a Pentium 133 [and it was outclassed as state of the art almost by the time I plugged it in] quite calmly reposing in one corner of a room in my home that can absolutely make that 1959 behemoth's performance compare to that of a kindergarten dropout!

It is from the keyboard of that machine that I make a feeble attempt at performance in what may be America's most influential assignment affecting amateur radio not only today, but for future periods, possibly even generations - the chairmanship of the VEC's Question Pool Committee which drafts and puts in public domain the question pools from which all written amateur radio licensing tests must be generated. The QPC is a prolific user of the internet's electronic mail to the degree that I have been known to handle from 600 to 1,000 items of that description in a single month. That group simply could not function in the manner we have spoiled Amateur America to expect without E-Mail.

Kids are computer literate

Many of today's better schools are

introducing the student to the computer in the primary grades, and many a middle school student [including my own grandson!] is even more computer fluent than any of their previous generations of adults.

Those kids consider it run of the mill to boot up and play the game they just happen to be carrying in their jeans pocket on disk! If there is an internet connection, depend on them to show you how to surf the web or engage who knows who in digital conversation on what subject, often transcending language barriers that would be insurmountable to you and me - they actually taught him french in the third grade!

Those kids don't need to study for and pass a licensing test authorizing them to play, nor will they tolerate others enjoying greater operating privileges than they possess! They are at their total liberty to experiment on their own, using whatever level of expertise they may have developed, or accidentally develop as they proceed, as they accomplish who knows what.

There is where many an otherwise potential amateur operator engages in probably the world's most intriguing mental gymnastics of today.

I don't think this condition was brought about by anything the amateur community did wrong, nor do I see any alternative course of action that could have dodged that bullet. After all, the horse and buggy really didn't do anything serious enough to justify all but total extinction either. The fact that counted was that Henry Ford did a lot of things right. Only time will tell if that is a fair comparison, and I'm with you in hoping not so.

You see, I don't think the typical totally computer literate adult of tomorrow could even find the home of, let alone deliver a container of oxygen to, the person whose life literally depends on it in veritably any weather conditions. That capability should not be permitted to slip away from us.

America, yes, even the world, needs amateur radio, but will it be here when it is needed? Don't we all hope two things - first, that the travesty of Pearl Harbor never repeats itself, and second, that amateur radio is here if it does?

WEST ANTENNA CORP. - YOUR SOURCE FOR ROHN TOWERS AND ACCESSORIES

BOOSTER PACS

Hey!!! The power is off! Why didn't I build up that battery pack I have been going to do for years? Now I don't have an emergency battery supply for my 2-meter or 440 rig.

This is exactly what happens when there is a power failure. We all have been thinking or going to build something like this for years, but we haven't. We didn't have the tools to make a wooden box or some other container. Then how do we make connections to the battery that will be quick and easy to use?

Now there is a quick and easy solution to this problem!

BOOSTER PAC

The Booster Pac is not only good for an emergency power supply but has enough power to jump off your car or truck. The Booster Pac can also be used with an inverter to run low power 120 vac equipment

**Do not confuse Booster Pac
with other cheaper packs on the market!**

Booster Pac Battery Data

The batteries in the Booster Pac are jell lead-acid type and will not spill when turned over. Batteries will work in any position. They have heavy duty copper jumper leads and battery clips. They also have a cigarette lighter jack on the side of pack with a rubber dust cover.

Both battery packs have a test switch that will show the percentage of charge remaining in the battery as well as full charge indicator shown on the led display. The cigarette lighter jack has a 12 amp automatic resetting circuit breaker.

OTHER NEW ITEMS FROM WEST ANTENNA

CAST IRON COUNTER WEIGHTS - manufactured by West Antenna primarily for the commercial tower installers to get hand lines down tall towers are now available to hams. These 9 and 24-pound iron balls with eye rings are ideal for hanging on the ends of dipoles strung through trees to help prevent the wire from breaking in a high wind when the trees sway in opposite directions. They are available in high visibility orange or nearly invisible black. Please specify color when ordering.

RS-400 9-lb. iron ball - \$20.00 RS-550 - 24-lb iron ball - \$38.00

West Antenna still carries all the other items listed in our previous ads. which include - Rohn Towers, PolyPhaser lighting protectors, circuit breakers, fuses, fuse holders, rope, etc. See ads in earlier editions. *Call us for information and for your needs.*

Booster Pac Models Model es2500ke

\$149.95

Boost rate, peak 900 amps, 250 cranking amps, weight 17-lb. Size 10.5 x 3.2d x 14h (inches)

watts - hours

4	40	24	6.5
9	20	40	3.5
15	13	80	1.5

Comes with a esa-2 charger and esa-1 extension cord, 12-volt DC power pack, portable and cordless for home, auto, recreation. Battery booster, 250 cranking amps of power. Starting vehicles fast. No more tangled cables. Use with sporting equipment, electronics, emergency radio equipment, lighting, generators, farm equipment and many other applications.

Model es7000ke

\$279.95

Boost rate, peak 1200 amps, 600 cranking amps, weight 38.5-lb. Size 13.5w x 7d x 15.5h (inches)

watts - hours

4	84	24	14
9	42	40	8
15	27		

Heavy duty Booster Pac - comes with esa-6 charger and esa-1 extension cord. 12-volt DC heavy duty power supply. Power with more features. Automatic short circuit protection, powerful 1200 peak amps and reverse polarity protection. This unit has the same percentage of charge and full charge indicators as the es2500ke model.

*Prices include shipping to
anywhere in the United States.*

NEW DATE!! NEW FORMAT!!

the eastern side
Kentucky News

-by FRED JONES, WA4SWF

E-mail: wa4swf@eastky.com

511 Lackey Ave., Louisa, KY 41230

I want to thank the editor, Wayne Williams for giving me the chance to write for the Repeater Journal, I do consider this an honor. I have always wished that someone would come forward and write news about the hams and clubs in our state of Kentucky, but no one came, so I got to talking to Wayne about it, and he invited me to try my hand. With your help, I will get us all in the news!

I hated to see that Jeff Martin, N5KOL has resigned as SERA KY Director, he will be missed. I know that Mark Smith, KM4IV will do a great job as the new Director. I want to send out my congratulations to him on this job, and if I can be of any help to him at all please call. I expect he will be sending me news about new repeaters and coordinations across the state, which I will pass on to you through the Kentucky News column.

In Louisa we are working on activities on the repeater here, we have a net on Thursday nites on the 147.390 machine, called The FriendShip Net started by Leonard Compton, K4PFZ. You just check in and then you are later called upon to give whatever comments you want and announcements of testing, hamfests, club meetings, etc. This net help to generate our A.R.E.S. Net that comes on later where we give emergency training and how to make calls on the repeater during emergencies.

We also link our repeater during the week to other repeaters that have ARES training on them and traders' nets too.

For many years I use the send all my info from this area to Ted Wolfe, WD4KHL, who use to write WV Notes. I would like to say that he is missed very much and I do miss getting the packet messages from him. I hope wherever you are now, in ham heaven, you are doing just great Ted and I hope you will like my articles. I really did look forward to reading his and hope I can do near as well. I do know that the new editor Barbara Marsh, KB8GGG will be kept very busy filling a big pair of shoes in West Virginia. I was reading her article last issue and she is off to a great start too.

I do hope that all the Eastern KY readers or anywhere KY that have something they would like for me to put in my Kentucky News column, please contact me. I need lists of hamfests, meetings, VE tests, anything that will be of interest to readers of the Journal. Please put me on the mailing lists for your club newsletters. I would like to get pictures of groups and repeater sites, stories as what is going on with your repeater group.

I will be getting together a list of the nets that are on the repeaters in our area of Eastern KY. and will try my best to give you a little info about each repeater and what is going on with their systems. Remember I do need your input that is what it is all about everyone working together to get things done. We can get some publicity for Kentucky in the Repeater Journal. I thank you for reading this and hope to hear from you for the May issue.

Hamfests jockey for dates

The annual jockeying for position with hamfest sponsors is well underway for the 1997 season. Reasons for date changes vary from show to show. Some move to get a clear weekend, away from some conflicting competitive show which might be costing attendance, dealers or both, while others move because of the time of the year, generally weather related. Finally some move to get more time away from larg-

er area shows, hoping area hams will then attend both shows.

This year's changes we find:

Charlotte, NC - The Charlotte ARC is moving their show from August, up to June 8th, staying at the Skating arena.

Concord, NC - The Cabarrus ARS is moving their show from the first week of November, up to Sunday, June 1. They also plan to open Saturday afternoon for computer dealers, and any ham dealers who might be in and ready. They remain at the Cabarrus County Fairgrounds.

Spruce Pine, NC - Cancelled their show in 1995, came back in 1996 in June. For 1997, they have moved to July 12.

Knoxville, TN - The Kerbella ARS after fighting the weather several years, including a postponement last year because of snow, decided to get out of early February and move to March 15 for 1997. They will stay at the Kerbella Shriner's Temple.

Roanoke, VA - The Roanoke Valley ARC, after having their show in May for years, moved to April last year, and now have shifted their date to August 16 for 1997. They move back to the Roanoke Civic Center this year.

Wilmington, NC - We understand has cancelled their show for 1997.

We find that more shows are setting and confirming their dates earlier, promoting heavier and advertising more, than in previous years.

Pure logic will give you answer!

*-supplied to the Repeater Journal
by Ray Adams, W4CPA*

Once upon a time a King had a Prime Minister that made a mistake and was beheaded for his blunder. The replacement Prime Minister soon made a mistake and was likewise dispatched.

The process repeated itself several times, until the King thought he actually had a Prime Minister that was in fact perfect.

Eventually, even the superb performer that he was, the present Prime Minister made a mistake, much to the dismay of the King. The King thought "I've always said when a Prime Minister made a mistake, he must be beheaded, but if I cause that to happen in this instance, with whom can I replace him that will perform even comparably?"

The King caused the Prime Minister to be led blindfolded into a room and turned around several times to confuse him as to which door he had used to enter the room. His blindfold was removed, and he found himself in a room with two doors, and two men. He was told that one man was sworn, under the pain of death, to tell the truth regardless of what was asked. The other man was sworn, under the pain of death, to tell a lie regardless of what was asked. He was not told which man was the liar or which man was truthful. He was told that one door led to a guillotine and the other door led back to his office, and that both men knew where each door led, although he was not told. He was to be permitted to ask one question only, must direct one of the two men to answer the question, and then he must immediately walk out of the room through the door of his choice.

The next morning the Prime Minister was back at his desk in a normal manner.

WHAT QUESTION DID HE ASK???

The answer will be in the May issue of the Repeater Journal. Meanwhile, if you think you know the question, e-mail it to us or drop us a line in the mail.

We'll give a one year FREE SERA membership to the FIRST correct answer.

It's not too early to make plans to attend the

the tennessee news team
NE. Tennessee News
 -by CURTIS HARBIN, AE4BT
 134 EVERGREEN ROAD, JONESBORO, TN 37659

Hello everyone - A special greetings from Northeast Tennessee. I'm Curtis Harbin, AE4BT, and I will be writing occasionally about my part of the great state of Tennessee and our many hams and repeaters and clubs.

I expect to be working with the other two "new" Repeater Journal correspondents for Tennessee, Bob Gault KD4NEC, and Wayne Houser, KQ4EG. The three of us should be able to cover just about all the news.

If you or your club is in the NE portion of the state, please put me on your club newsletter mailing list. I hope you will also remember me for those special events that occur in your area, new repeater systems, club elections, or anything else newsworthy. Please send it to me, and I can pass it along to the Repeater Journal.

A little about me. I am 38 years old, a licensed ham since 1992. My wife is Pam, KE4KTD. I am an electronics technician for a local Motorola service station - 18 years plus there. I hold a first class phone ticket as well as my Extra class amateur license. I'm active in our local radio club and enjoy doing the HF traffic nets.

My reason for volunteering for this job - I have been an avid supporter of SERA for years, and have faithfully read the Repeater Journal, but I have been disappointed at the coverage that has been from Tennessee. Well, myself, Bob and Wayne intend to change that. If you have items to send me, send them to: Curtis Harbin, AE4BT, 134

Evergreen Road, Jonesboro, TN 37659-6206.

And now a few news items:

On December 17th, the Johnson City ARA had their annual Christmas banquet and awards dinner. Re-elected to office for the coming year were:

President - Curtis Harbin, AE4BT, Vice-President - David Jones, WD4D, Treasurer - Ed Ingraham, WX4S, and Net Director - Richard Randolph, KT4DR. At the banquet C.V. Jayne, W4NHT was chosen as ham of the year for the club.

The Johnson city ARA operates the 146.79 repeater and conducts nets every Tuesday night at 9:00 pm. the club President and the net director has also started a 10-meter net on Tuesday nights at 8:00 pm on 28.405 MHz. This net was started to get more novice licensees interested in the club and to promote Amateur radio. Both nets are open to all amateurs, so if you can hear the stations, feel free to check into any of them.

Several East Tennessee repeaters are being troubled with interference and intermod, from keying the repeater up by itself and having paging and other traffic come through to totally saturating the receiver and not being able to let operators in because they cannot overcome the noise. This is mainly effecting the 2M machines, although, from time to time, it is also effecting the 440 machines, even those with tone inputs.

The Carter County ARES/RACES crew is using the 145.29 machine for their nets on Wednesday nights at 8:00 pm. all are welcome to check in. EC is Paul Tolley, KD4INB and assistants and captains are: AE4SB, Ed,

KB4ZVA, Ryan, and KF4ETA, Tammy. This is a newly formed unit and they are trying to make things work in Carter county. Any and all check-ins would be appreciated.

That's all for our first installment in the Repeater Journal. Remember, send us your newsletters, and send news. Thanks...Curtis!

SEVEN STEPS TO STAGNATION

1. We're not ready for that.
2. We've never done it that way before,
3. We're doing alright without it.
4. We tried that once before.
5. It costs too much.
6. That's not our responsibility.
7. It just won't work.

E. Tennessee News Continues

join SERA and get the Journal. This is how we all stay informed. You can contact me at my above address at the top of this column or by using my E-Mail address. (Just a note: I ESPECIALLY LIKE RECEIVING E-MAIL). I will stay active on area repeaters and I will be at many of the Hamfests throughout Middle and East Tennessee this year. I hope that we can get together and discuss ideas that will be beneficial to our many "Repeater Journal" readers. Hopefully we can sign up a few new readers. Bring a friend by our booth.

Remember for East and Middle Tennessee, contact: WAYNE D. HOUSER, KQ4EG. For West Tennessee, contact Bob Gault, and NE Tennessee, contact Curtis Harbin. (See their short introductory stories this issue.)

A Georgia Grabbag! - by Stu Sims N4MXC

A NEWS PERSPECTIVE THRU THE EYES OF THE GEORGIA COORDINATOR

A few items of interest for the Georgia Repeater Family . . . Owners and Users . . .

1. First . . . I appreciate the kind words and response to the last issue's grabbag . . . guess we need to keep it up!! I was flattered and surprised at the response. If you have something you believe should be mentioned . . . please feel free to forward to me via E-mail or any other means that fits the bill.

2. Secondly, I would like to recognize and thank the Gwinnett Amateur Radio Society (GARS). I enjoyed the opportunity to speak with them and give them a presentation about SERA, where we have been and where we are going, and most of all what we do to serve the repeater family. But most of all, I would like to thank them for their stimulating questions and above all their hospitality. A progressive group from Lawrenceville, GA these folks make a meeting fun . . . just don't try to get Howie and I going the same evening because it makes for a long evening!!! Only one word of caution, watch where their repeater trustee takes you to eat!!

But, if I hadn't been behind schedule I could have eaten with the rest of them: at the normal place and wouldn't experienced the difficulties I ended up experiencing.

(Please note . . . no names mentioned here . . . need to protect the innocent . . . but boy did I end up ill!!)

3. I had occasion to wander across a number of states early last month, some neighboring SERA Districts and some neighboring coordinating districts. I was driving a van load of computer equipment to New York. The van

was brand new and rented, and I was still getting used to it when I hit a bridge north of Florence, SC late at night. The night sky dark, the weather good, and the road was clear. I was rolling right a long and had just tuned to an active repeater. As I hit the bridge at highway speeds traffic was light . . . then I found it, a stalled truck (18 wheeler as they say on the "other" band!!) with safety triangles out just behind the truck. No advanced warning, limited lighting or visibility, on a dark night, and an unfamiliar highway. I was able to safely negotiate my way around the obstruction on this bridge. While this wasn't an emergency the situation posed a hazard situation where someone else may not have been as fortunate. I asked for some assistance from a Florence station to either access an autopatch or relay some information to the highway patrol. All stations stood by and John, KA4JAL, came back to me. After I relayed the information to John, expressing my concern for traffic safety, John handled the situation professionally and calmly. His patience with my directions and descriptions of was noteworthy, he made sure of where the obstruction/hazard was and simply relayed the information, and asked if I needed any other assistance . . . Good job John and thanks again for the help.

4. On the return trip, while trying to contact a SERA North Carolina correspondent . . . some folks were kind enough to help me out, and I enjoyed a number of very welcome cups of coffee with and a great visit with Cindy Rogers, KR4LS, and her husband. This

being the first time I had met them, I would like to thank them for the hospitality and the opening of their home to me. It provided a very welcome break after over 2 days of sitting either in a driver's seat or restaurant!!! So when you hear those traveler's, extend whatever hospitality you can because they may return the favor someday!!

5. Last issue of the Repeater Journal, I encouraged repeater owners/trustees to ensure the annual datasheet for their repeater(s) was returned, because if their repeater met certain criteria and the datasheet not returned, we were not going to list their repeater UNTIL the status of the repeater was resolved. You will note a number of repeaters missing from the listings. If yours (or the one you use) is among them please get the datasheet back to the database manager!!

Repeater users, if the repeater you use is not listed, help me out, contact the owner/trustee, and let them know it isn't listed and tell them what they need to do to fix the situation.

Not to be crass or harsh, but we've spread the word on at least three occasions and included instructions with the datasheets. We can't serve people if they don't talk to us. Maybe a word from their users and friends will encourage them to cooperate. By the way, just because a repeater pair isn't listed doesn't necessarily mean it is now available. We (SERA) still have to resolve the status of the repeater. But it does mean the pair MAY become available.

6. Last November we talked about the availability of repeater pairs, frequency ownership, repeater owner/trustee responsibilities, and asked the amateur community and repeater users to help us out by identifying those repeater not on the air. Believe it or not (Ripley would be proud). Some people have

(Continued on Next Page)

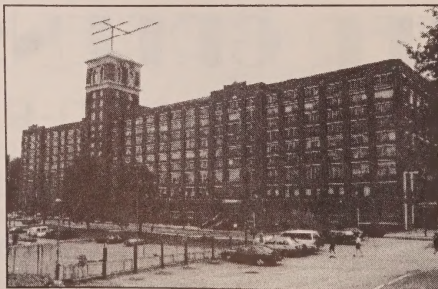

Presenting - The Atlanta Area's 69th

1997 ATLANTA HAMFEST

(Sponsored by Atlanta Radio Club)

JUNE 21 & 22 1997

That's the weekend before field day, week after Albany, and 2 after Dallas. Same super midtown qth with park-deck tailgate, police precinct, & 140,000 sq-ft inside new & nearly new vendor space. Best city hamfest prices in USA!

Location is just East of the Interstate highways over Freedom Parkway near Carter Library.

While here, take yourself out to the ballgame, museums, shops and galleries in the nearby neighborhoods.

It'll again be a ham community party with many complimentary set-up lunches, etc.

Contact us at (770) 493-8438 or FAX (770) 493-6982

e-mail: BillW4LFC@juno.com - browse at <http://www.saf.com/arc>

Atlanta Radio Club / PO Box 942150 / Atlanta, GA 31141-2150

Y'all Come... says chairman 'lfc

Georgia Grabbag Continues

responded, and we are contacting those repeater owners/trustees!!!

Ah progress... ain't it great?? Repeater owners/trustees with repeaters not on the air... anyone you know who has made this list???

7. This issue I would like to discuss... the purpose of a repeater... relate it to coordination policy, some repeater etiquette and what a repeater is intended NOT for -- according to the ARRL Handbook.

"Originally, repeaters were intended to enhance mobile communications." This has been expanded to simply mean... repeaters are intended to enhance communications by repeating and amplifying for handheld (portable) and mobile operations.

The main enhancement being, of course, increased range and coverage based upon a repeater's height and increased transmitter power.

Now given the simple definition, the required co-channel separation required by SERA's coordination policy is 100 miles with the provision some additional consideration MAY be given to repeaters located at unusually higher locations. Thus the coordination policy accepts as general rule a repeater's area of coverage to have a 50 miles radius around the repeater location, and the coordination policy and utilization of repeater pairs is generally driven by the original purpose of a repeater... to enhance portable and mobile operation.

And, in most cases, SERA sticks to the 100 mile minimum co-channel separation while trying to get maximum utilization from

the available repeater spectrum.

In past years the amateur community was smaller and people generally lived in or close to metropolitan areas, and repeaters were concentrated in and near those areas. With the growth of the amateur population and movement of people out to the suburbs or surrounding communities the need for additional repeaters in these outlying communities has increased.

Since even though people moved outward, repeaters did not necessarily move or spread out. This has meant simply that we must utilize all the pairs available to meet these increased needs or demands on the available spectrum. While we are still maintaining the minimum separation it means there are simply more repeaters on a given pair and the luxury of DXing a distant repeater was sacrificed in favor of serving the larger part of the amateur community and those rural areas without repeater service. FM and repeaters is the largest and most popular facet of amateur radio today... and the growth of the amateur community and demands on the repeater spectrum continues to grow.

Given the original intent of repeaters... to enhance mobile operations (and portables), it is NOT considered appropriate for base stations using high fixed antennas and increased power to dominate repeater use. I recently had TWO calls from parties (both higher class licensees) who expressed concern (complained) about a repeater in a rural community interfering with THEIR capability to operate a repeater and conduct a net... and this repeater was 140 miles (plus) distant from their residence (shack)!! And the repeater they desired to use was located in another state. While we all realize radio waves traverse borders (city, county, states, and international) (at least I think we all do anyway), if

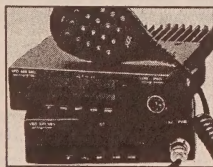

you want to be a routine user of a repeater in another state or country and you don't live in the repeater's "normal" area coverage for a handheld or mobile station, then, respectfully, you shouldn't use it or should consider moving within its normal area of coverage. I have had people actually express this same concern over repeaters that are up to 300 miles away!!! And because they could access them cleanly from their base stations, with tall towers, and high gain antennas in the past they felt they should be able to forever... guess they expect everyone to sell their handhelds and mobile rigs.

This is 1997 folks! The demands on the repeater spectrum are just too great to be able to set aside repeater pairs for DX work. New repeaters are going to appear that meet coordination guidelines based on the original intent of repeaters. If you want to talk to someone over long distances -- use simplex, SSB or HF. Use repeaters for what they were intended... an enhancement for portable and mobile operations.

Late Item: Lowry Rouse, KM4Z has been appointed Emergency Coordinator for Gwinnett Co. The Gwinnett ARS recently had a SKYWARN certification class by the NWS in which 103 spotters were certified. The ARES including SKYWARN net now meet on the 2nd and 4th Monday nights monthly on the GARS 147.075 repeater at 9 pm. Lowry said he was interested in communicating with other E.C.'s and SKYWARN participants for establishing a working relationship for wide area disaster cooperation and for them to pool their knowledge and support in case of emergencies. Lowry can be contacted at km4z@bellsouth.net or (770) 972-7248.

8. If someone comes up with a repeater issue or question they would like me to address just send it to me, or I will pick one.

INVOICING AD INSERTION ORDERS

DEALERS: With a volunteer staff we do not send out and receive advertising contracts and notices. Quarterly dealer invoices, after insertion, will request information pertaining to future insertions. If no instructions on the paid returned invoice are received, the ad will be repeated and invoiced the upcoming quarter.

HAMFEST: advertising must be ordered each edition for insertion. Payment must accompany insertion order for advertising copy for Hamfest ads.

ADVERTISING PAYMENT POLICY

Advertising invoices are due upon receipt. Paid invoices will require us to withhold any additional ads in until account is paid in full. All Hamfest advertising and Business Card Advertising must be paid in advance of insertion.

SPECIFICATIONS & GENERAL

Sizes listed Above are width by length in that order. Ads received that do not fit dimensions will be adjusted to the nearest ad size and be billed \$8.00 production fee. The ad will be billed at the size rate it had to be adjusted to.

Prices quoted are for exact size, camera-ready positive photograph, pastepup or Laser print ad copy.

Full color ads for covers require negatives, right-reading emulsion down, sized for full 8-1/2x11 bleed. 150-Line screens preferred. Color Match Proof, Color Key or Pre-printed tearsheet should accompany negatives.

Design, typesetting, layout or pastepup is available at a nominal charge.

The Repeater Journal cannot be held liable or responsible for errors in advertising, or to the quality or accuracy of advertising claims.

When possible, advertisers requiring typesetting or composition by the Repeater Journal staff will receive a proof with time for telephone corrections. No proofs are available for ads with typesetting submitted after deadline, due to staff and time limitations.

ADVERTISING DEADLINES

All advertising copy and insertion orders should be sent to the Journal Advertising Manager:

Sharon Ward, Advertising Manager
P. O. Box 215, Tobaccoville, N.C. 27050.
Phone (910) 983-0879
Fax (910) 983-4012
E-Mail: sfward@vnet.net

Ad copy deadlines are the 1st of the month, prior to month of publication. New ad insertion order deadline is 10 days prior to copy deadline.

The Repeater Journal cannot guarantee publication of any advertising that arrives after deadline unless prior arrangements are made with the Repeater Journal Editor or Sales Manager.

AD & COPY DEADLINE DATES

FEBRUARY ISSUE - January 1,
MAY ISSUE - April 1,
AUGUST ISSUE - July 1,
NOVEMBER ISSUE - October 1.

The Repeater Journal is published by
and is the magazine voice of SERA, Inc.

Albemarle ARC of Charlottesville (VA) stays on track

-by Ron Richey, K4RKA

The Albemarle Amateur Radio club, W4TFZ, operates four voice repeaters, two on two meters, on one 220 MHz, and one on 440 MHz. a packet node, and a PBBS on two meters.

Thanks to the efforts of Hein Hvatum, N4FWA, the 146.925 repeater has found a permanent location on top of Martha Jefferson Hospital in downtown Charlottesville. While not as high

a the previous location on Observatory Mt, the site provides several benefits; emergency power from the hospital backup system, ability to use a bigger and higher gain antenna, and good coverage of the city of Charlottesville which is primary objective for this repeater.

With the antenna and basic repeater improvements, the overall coverage has decreased only slightly to the north and actually improved to the south. Coverage of the city proper is now possible with a handheld from almost all locations. The new equipment allows the use of 88.5 hertz sub-audible tone squelch when interference causes continuous keying problems. This has been seldom necessary and the repeater is on carrier access 90% of the time. Credit also goes to Joe Fritz, KD4RWX, Gerald Nauman, KN4FM, Rich Bradley, WB3DZC, Tom Lachendro, AD4AD, and the chairman of the AARC Technical Committee, Mike Duvall, AC4ZQ, for getting this machine up and running in its new location.

Our other repeaters have also had various improvements. An amateur can use touchtone 911* on the 146.76 machine to report an emergency situation. Touchtone 0* will close the patch. The 911 center has been trained to accept reports from hams and many calls have been successfully made in the past year. This repeater also has the capability of operating with 88.5 Hz subaudible tone when necessary. When the tone access has been enabled by the control operator, it may be temporarily turned off by a user on the 146.16 input frequency by touchtone 325*, allowing normal carrier access. The repeater will revert to tone access after 1 minute of carrier or by touchtone 326*.

The operation of the packet node on Carters Mt. has also been improved. Contributors to these efforts including site maintenance include (in addition to those mentioned above) Sam Gentry, N4WJQ, Bud Beazell, KB4JN1, LeRoy sutter, WA4MHP, Pete Taylor, KC4UCK, Brian Fox KE4HIA, Rich Berman, KO4WQ, Bob Stannard, N6AAR, Bob Pattison, KM4DU, Pete

Wildman, AD4TU, Harry Dannels, W2HD, and Greg Foust, N4PGS. Apologies to anyone missed - your efforts are appreciated also. This is a big improvement from several years ago when only about 3 persons were struggling to keep fewer and less capable repeaters on the air.

There are two regular nets on the 76 repeater; the Monday night Info Net at 7 PM with net control Marc Rowley,

N4TZE, and the Thursday night Northern Piedmont (ARES) emergency Net at 8 PM with net control Mossir Jones, NM4R. The Thursday night net is usually followed with the ASRC On-The-Air-Swapfest and Technical chaired

by Ron Richey, K4RKA, and Joe Giovanelli, W2PVY, respectively. Others who fill in as net control when needed include Harry Dannels, W2HD, and LeRoy Sutter, WA4MHP. anyone in the area or passing through is invited to join either of these nets.

Hein Hvatum, N4FWA, organized several practice emergency and public service events this past year. The ASRC/ARES group also participated in a couple of real emergencies including the Madison county flood in June. A number of capable people including Sam Gentry, N4WJQ, have proven their ability to respond on very short notice. Our net training and practice exercises have really paid off then the real thing occurs.

The traditional ARRL Field Day emergency exercise is held annually by the club, last year well organized by Pete Taylor, KC4UCK, John Schnatterly, KQ4MY, and Pete Wildman, AD4TU.

The AARC also publishes a monthly newsletter and a yearly directory of Radio Amateurs in the Albemarle county area. Thanks to Joe Fritz, KD4RWX, and Mike Johnson, KD4NNL, for their efforts. We are expecting equally fine output from our new newsletter editors Paul Deal, WB9HGZ, and Eileen Dean, WD9EIA.

New ARRL Computer Book

The ARRL announces a new computer book for hams. It focuses on aspects of hamming with computers and provides many hints and traps to avoid when upgrading. Practical charts, tables, suggestions are provided to assist any operator.

"Personal Computers In The Ham Shack" is now available through your favorite book dealer, or at ARRL Headquarters.

The SERA Repeater Journal VE/VEC EXAMINATION SCHEDULE

This schedule is published free as a public service of SERA. Schedules are supplied by the individual VEC/VE teams on a quarterly basis. Examinees are urged to call numbers listed to verify schedules before planning to attend an examination. Changes to the lists may be made to the Repeater Journal editor. The Repeater Journal assumes no responsibility for erroneous or outdated listings.

ALABAMA

Rainbow City (WCARS-VEC) (145.49)
Walk-in exams on 2nd Saturday of each even month at 9:00 AM - Rainbow City Hall. Sked: Apr. 12, Jun. 14, Aug. 9, Oct. 11, and Dec. 13. Contact Gene McLaughlin K4TTF (205) 492-8194 or Alternate, Lloyd Heald, Sr. AD4VB, 205 Sherwood, Gadsden, AL.

ARKANSAS

Forrest City (WCARS-VEC) (146.76)
Walk-ins on 2nd Sat. of even months at 9:30 AM at the East Arkansas Comm. College. Sked: Apr. 12, Jun. 14, Aug. 9, Oct. 11, Dec. 13. Contact Tom E. Elliott, KK5YN at (501) 633-4207 or Alt. Preston E. Koelling, N0HQJ at (501) 630-1168.

Helena (WCARS-VEC) (145.39)
Walk-ins are held on the 2nd Saturday of odd months at 9:30 AM at the Chamber of Commerce Building. Sked: Mar. 8, May 10, Jul. 14, Sep. 13, Nov. 8. Contact Nicholas L. Jacks, WX5J at (501) 338-8520 or Alt. Tom E. Elliott, KK5YN at (501) 633-4207.

GEORGIA

Atlanta (North) (ARRL-VEC)
Walk-ins 4th Sunday monthly at 2:30 PM at Church of the Atonement, Highpoint Rd. Call Neil Foster, KC4MJ 449-3340

Augusta (ARRL-VEC) (146.985)
Walk-in exams 2nd Saturday, odd months at Hillcrest Bap. Ch. (Hwy US-1 S) at 9:00 AM. Contact Ace Norton, NA4I (706) 798-5066.

Augusta (Dearing) (ARRL-VEC) (146.775)
Walk-in exams on 1st Saturdays of even months, registration at 9:00 AM at the CSRA RESA office (old Dearing School), Contact Mark Cheek, AB4XB (706) 595-5867 (N) 556-6225 (D).

Dalton (WCARS-VEC)
Walk-ins on last Saturday of even months at Dalton Jr. High Tech. Lab at 3:00 PM. Sked: Feb. 22, Apr. 26, Jun. 28, Aug. 30, Oct. 25, Dec. 27. Contact Bert L. Coker, N4BZJ (706) 259-5625 or Harold W. Jones, N4OTC, (706) 673-2291.

DeKalb County (CA-VEC)
Walk-ins 4th Thurs. at 7:00 PM at DeKalb Co. Police, East Precinct, Lithonia. Call Harvey Pearson, WB4PHF 972-5061.

Douglasville (QRV-VE)
Walk-in exams 4th Tuesday of each month at the United Way Service Center on Fairburn Rd. at 7:30 PM. For info contact Team Liaison, Shirley Durham, KR4KO at (404) 949-9025. Doors open at 7:00 PM.

Ellijay (WCARS-VEC)
Walk-in exams on 1st Saturday of each month at the Gilmer City. Pub. Library at 8:00 AM. Sked: Mar. 1, Apr. 5, May 3, Jun. 7, Jul. 5, Aug. 2, Sep. 6, Oct. 4, Nov. 1, Dec. 6. Contact Hugh Beam AD4E (706) 276-6660 or Alt. Dorothy Beam N4DTC, (706) 276-6660

Lawrenceville (W5YI-VEC)
Walk-in exams 1st Sunday, monthly at 2:00 PM at Jackson EMC, 461 Swanson Rd., Lawrenceville, Contact Duane Reynolds, WB2YAD, 962-9582.

Lilburn (W5YI-VEC)
Walk-in exams sponsored by the Gwinnett ARS are held on 4th Friday, monthly at 7:00 PM at St. John Neumann Church, 801 Tom Smith Rd. Contact Howie Gould, W4NVF, 921-8362. Headphones!

Marietta (CA-VEC)
Walk-ins each 3rd Saturday of the month at 9:00 AM at the Marietta 1st United Methodist Church, 56 Whitlock Ave., RM 319. Contact Larry Huff, W4CQZ - 955-3171.

Milledgeville
Walk-in exams 2nd Saturday of each month at 10:00 A.M. at the Mary Vinson Library on Jefferson St. For further information, call Charles Pennington, K4FRM at (912) 453-8977.

Peachtree City (CA-VEC)
Walk-in exams 1st Saturdays at 9:00 AM at Peachtree City - City Hall. Take exit 12 off I-85. Contact Mike Murphy, KB4KZY, 487-7494.

Roswell (ARRL-VEC)
Exams 1st Monday of each month at 7:15 PM at the St. Ann Catholic Church, 4905 Roswell Rd., Marietta. For info, contact Delaine McCarthy, KM4FV 993-9758.

Stone Mountain (CA-VEC)
Walk-ins 2nd Saturday of each month, at 8:30 AM at Stone

Mt. Methodist church, Contact Hal Martin, K14RD, 469-6430.

INDIANA

New Albany (WCARS-VEC) (146.85)
Walk-ins 3rd Saturday of even months, 10:00 AM to 2:00 PM at Indiana Univ. South, Rm 204 Knobview Hall. Sked: Feb. 15, Apr. 19, Jun. 21 at Salem, IN hamfest, Aug. 16, Oct. 18, Dec. 20. Call Dick Trux, K0RT, (812) 246-6377 or "Mac" McCrory, NM9A, (812) 944-6661.

KENTUCKY

Hazard (WCARS-VEC) (146.67)
Walk-in exams 2nd Monday Night each quarter at 7:00 PM at Hazard City School Business Office. Sked: Swapfest Mar. 8 10 AM, Apr. 14, Sep. 8, and Nov. 10. Contact John Farler, K4AVX (606) 436-5354.

Hermidon (WCARS-VEC)
Exams will be scheduled at times and places to be announced. For further information contact Steve Johnson, K14MT at (502) 885-1652.

Irvine (WCARS-VEC) (146.82)
Generally monthly sessions at Estill City, H.S. Walk-ins normally accepted. Sked: Mar. 8 at Hazard HF, May 10, Sep. 13, Oct. 11, Nov. 8, Dec. 13. Call Duane Riddell, WB4AIA (606) 723-4500 or Glen Wise, WB4ZJB (606) 723-4933.

Lexington (WCARS-VEC) (146.76)
One Sunday session in first month of quarter, at Lexington Public Library, Main St. at 1:30 PM. Sked: Apr. 12, Jul. 12, Oct. 11, and Dec. 6 (this date in Salyersville) Call Junior Carly, KR4HT (606) 255-2123 or Joe Esposito, K2YJL (606) 225-7166.

MISSISSIPPI

Gulfport (ARRL-VEC)
Exams held at Harrison City. Courthouse in CD conference room at 9:00 AM on 1st Saturday of each month. Call: Tommy Jackson, KB5OGM - 868-3450 or Donna Alexander, KA5OER - 896-4984.

Western Carolina Amateur

Radio Society/VEC, Inc.

An Amateur Radio Volunteer Examiner Coordinator

TECHNICIAN PLUS LICENSEES! WCARS/VEC WILL CORRECT T to P for you if there is an error in the FCC license database

The Technician Plus (P) is now formally recognized as a separate class of license.

The FCC database was adjusted without issuing corrected licenses reflecting the Technician Plus class to those who hold that class of license. DO NOT make the determination that the database is incorrect from the actual license you physically hold in your hand.

If you are now shown IN THE FCC DATABASE as a Technician and you can DOCUMENT that you should be Technician Plus, WCARS/VEC will correct the error for you. Send a completed and signed FCC form 610 (November 1993 ONLY) and marked for purpose 4B together with a copy of your present license and the original of the documentation (CSCE or written confirmation from the VEC that coordinated the session) to either of our coordinators listed below and we will be happy to also include it in the next electronic file we transmit. If you wish the original of the documentation returned, also include a copy of it for us to keep and an SASE for return of the original. We MUST see the original of the documentation. There is no charge for this service.

For more information or newly issued call signs call: (423) 689-6358 (11 AM to Midnight - 7 days a week incl. holidays) For VE team info, please contact one of the following:

Nostalgic wavelengths

With David Bower - Continues

almost guaranteed of spotting this old classic microphone. Many an old DXer has lived behind the Astatic D-104 as he spent long hours chasing that elusive station in some far-distant land. And when he exchanged cards, you can bet that he proudly listed this microphone along with his transmission equipment and antenna on the QSL.

Why this microphone has survived so many years is anyone's guess. Its certainly not the most beautiful design. It ranks as a large microphone in its class. Other microphones may have a better push-to-talk mechanism. It's certainly a tall microphone. Maybe that is what makes a classic. It defies logic and continues to occupy many a shack, and in others, simply a warmplace in the heart of the radio amateur.

FCC Delays new RF Exposure Rules

-Special from the ARRL Electronic Letter

The FCC has postponed for one year, until Jan. 1, 1998, the date for hams to comply with its new RF-exposure regulations. In the announcement made just at Christmas, the commission said more time would be needed for affected licensees to determine that they comply with the new requirements. The extension will also allow required changes to Amateur Radio operator examinations to be made at the time other, routine revisions are made between now and July 1, 1998. Among other things the new rules will require hams operating with 50W PEP or more to conduct "routine RF radiation evaluations" to determine if RF fields were sufficient to cause human exposure levels in excess of that specified.

The delay will give both the FCC and hams more time to better understand the implications of the rules and will give hams an opportunity to evaluate their stations as regulations will require. (See Jan. and Feb. QST for more details)

the happy hamette

Continues . . .

on the mail, turning into the eternal parking lot to meet chicken or be where they want them to be. You get on 2M and listen I scream at the radio for them to get off HAM radio and get a CB for all that stuff!

Anyway, with my strong vocal projection and good antenna I have never been 'light' into a repeater in my mouth's life. Where are the HF alligators when you need Scotty to transport them to VHF to squash this person out of my radio air space? I just want 5 little minutes to talk with my cousin! Yes, I know that alligators would get us too. But, this is my story and in it the interference would just affect KB10DUM, you see.

(Lord, help me be nice to this twit! I am the Happy Hamette).
"IS THIS BETTER? CAN YOU HEAR ME NOW?" (I hollered just as loud as I could.)

"Owee, that hurt mah ear, Miss Cindy. Chile, yew got some lungs on yew. Ah thunk yew overdrove yore mike. Ah wouldn't be surprised if it blowed up after how loud yew were. KB10DUM for ID over tew KR4LS. Mebbe Ah'd better git offa here so's yew can cawl yore friend."

(Tee hee! Works every time. Hope I did not, indeed, blow up my mike I am so bad.)

"KR4LS. Thank you so much, KB10DUM. 73s. Have a good day now. (I said sooo sweetly.) "KR4LS calling N2VRF...."

Has any of this ever happened to you? It is funny when you call out for someone and the Repeater King or Queen gets on and asks you all over who you are calling and why. I have really had this happen. I usually handle it something like the above. Once, we ignored the Repeater King who tried to break in an improper way. The message got across. I do not prefer to do that but it may be the only way. I do stay off a couple of repeaters because of this.

I don't have the perfect answer as to what to do as long as the HAM is permitted to reign over the airwaves like that. Sometimes, I suppose the owners trade off the boorishness of a Repeater King to have such a person to look out for things to prevent really illegal activities. Besides, at least, he or she's always there to answer if anyone comes through calling CQ. Well, sometimes no body else is around since the repeater King has chased off everyone else off except his cronies. Owners can't do anything as long as the person is not doing anything blatantly illegal. Being nosy is not illegal on public airwaves.

Of course, the repeater owner is responsible for everything that goes on the repeater. It must be a difficult balancing act for owners as well as potential users who must brave the Repeater King to talk.

Oh, let's meet on 2M and have a word or two anyway! I would love to hear YOUR voice. Lets all do what we can to play nice and share well with others and have fun!

North Carolina News - by Gene Fegely K3EJG

115 Randomwood Lane, New Bern, NC 28562 E-Mail: gfegey@coastalnet.com

The New Year always brings many resolutions, some lasting long, some fading quickly. My planned resolution to do more operating on the repeaters as I travel around may get a few more 'lurkers' to join in QSO's that seem to be getting shorter and shorter as hams find other activities.

The biggest 'new thing' seems to be getting on the internet, which has now become more crowded than the 80-meter band or (as I was told) channel nineteen. It has certainly brought a n o t h e r communications method for the SERA Journal, since most of the correspondents have email addresses!

From the email box, Debbie Hockaday, AC4QD, and hubby Dave, WB4IUY, have kept me informed of the many activities and plans of the Triangle East ARC, including a list of web pages to check on other amateur activities in the area:

<http://www.ipass.net/~wb4iuy/>
<http://www.ipass.net/~hockaday/>
<http://www.ipass.net/~teara/>
<http://www.geocities.com/TheTropics/3349/>
<http://www.RTPnet.org/~fcar/>
<http://www.RTPnet.org/~rdrc/>

A Western Echo heard

Steve Smith, KC5F, sent me a bunch of back issues of the Blue Ridge ARC newsletter, the Echo, with a little comment that there is activity out there in the mountains! From the enclosed membership list of over 100, it would certainly appear so.

One of their December activities was communications for a local Christmas Parade, coordinated by John Robinson, W1NEB, assisted by Jim Ballard, K4NYE. The group also performs a similar duty in April for the Apple Festival.

For those of you in the Hendersonville - East Flat Rock commuting area, they meet on the First Tuesday at the Stoney Mountain Activity Center. Check in also on Sunday nights at 8 PM on the 146.64 repeater.

Closer to the east, the Greensboro ARA meets at the Quincy Steakhouse on the fourth Monday, and also invites amateurs to check into the News and Information Net, Sundays at 9 PM on 147.76. An new antenna and feedline have give the repeater additional coverage, according to Editor Daryl Brewer, KE4MOH.

In Sampson County, Andy Stewart,

Coastal Carolina's Albert Parker Award

The annual Christmas Party of the Coastal Carolina Emergency Net was the setting for William 'Tex' Harper, W4RHU, to be surprised with the group's Albert Parker Award. John Buckner, KM4UZ, made the presentation, and with it turned over the duties of net manager. Tex will be assisted by Clyde 'Bud' Babb, N2WUO, from Glassboro, NJ.

The net meets every evening at 7:30 on 3809 khz, for the purpose of practicing emergency procedures, but really seems to be a friendly gathering of North Carolina and adjoining area amateurs. Net Directors are the above plus Weldon Fields, W4AJT; Pat Owens, WB4TWF; and Rev. Neil Brohn, KE4BJR. Andy Griffith, W4ULD is treasurer. -Coastal Carolina Photo.

members of SCARS. The 146.79 repeater was shut down for 24 hours in tribute.

A December Foxhunt?

The Union County ARS held a December foxhunt to show off some home-brewed attenuators, and enjoy breakfast and such. A clever idea was to have the finder become the next fox. It sure seems a good way to maintain the game with a time limit, with as many new foxes as needed until it is lunch time!

For those of you close to Monroe, the group meets on the third Thursday at the Red Cross Building. The club net is on 145.39, Mondays and Wednesdays at 8:30 PM.

Rick Crider, KD4FXA, was elected president, replacing Ron Lawrence, KC4YOY. Ron wrote an interesting message about the activities during his three-year tenure, but also bewailed the lack of participation from a club of over seventy members.

New Officers in HPARC

Mark McMahan, KB4MFP, president; Scott Carmichael, KE4ZFV, vice-pres; David Montgomery, WD4MKS, secretary; and ackie Rogers, KB4JHL, treasurer; bring an entire new slate to the High Point ARC.

As newsletter editor, Mark recently had to announce the passing of his brother Steve, WB4ZOS, from bone cancer. The newsletter also noted two more 'SK' members, Homer Hammonds, K4GLY, and Nancy Newton, wife of Warren, WA4FCP.

They have a new club call, KF4HFS, which will be put on both the 147.165 and 443.900 machines, by Steve Davis, KB4JIF, repeater chairman. The group meets on the 1st Monday at Golden Corral in Oak Hollow Mall.

N4ZHC, sent the Winter newsletter as a two-pager full of tidbits. Notable was the assistance of the club during Hurricane Fran at the Clinton High School which housed over 500 people. Artie Hansen, K E 4 K Q W, spent the night incommunicado when the repeater went down during the storm.

John Naylor, WB4OMN, is seeking more help for the next emergency I'm sure he can be contacted via the 146.79 net which meets every night... A somber note was the announcement of the passing of Thelma Haman Davis, KA4RZS, one of the charter

Ham Classes in Raleigh

For those close to the Raleigh area, RARS Exciter has an ad for ham radio classes beginning February 24th. Don't have details, but the contact person is education Director Lynn Pitegoff, KO4QH. Try one of the many repeaters sponsored by the club or attend a club meeting at the Forest Hills Baptist Church on the first Tuesday.

The Christmas party featured an 8-man acappella group from NC State. As a barber-shop singer myself, we call that a VLQ (very large quartet). But it does show that my two favorite activities can be combined...

By the way, congratulations to Editor Curt Phillips, K4CP, on the new call and one of the finest newsletters in the state. If you live in the capital area, membership in RARS is worth it, if merely for the timely articles and many activities offered through the newsletter.

Another interesting newsletter is the NAG-RAG from Walt Bastow, N4KVF. With several ew reporters contributing, I look forward to each month's commentaries. I have never been able to check into the Monday night 28.350 net or the Saturday morning 7.240 gatherings, but some day the conditions or my location will be right, I hope.

The group sponsors the Salisbury Fire Cracker hamfest, and proceeds go to a Christmas party and the newsletter. Both activities seem to always conflict with other things for me, but 'some day'...

Marty Smith, KA4NRR, had a recent article about the School Club Roundup held the second week in February. This is the type of activity needed to bring our hobby into the younger generations. Jim Haner, N2LTW, also contributes semi-technical articles of interest.

Application Handbook from MFJ

MFJ Enterprises announces a new book by Doug DeMaw, W1FB. The publication, Ferromagnetic-Core Design and Application Handbook gives you lessons about

proper core selection versus operating frequency, circuit Q, power handling and other facts required if you use inductors and transformers with magnetic cores.

DeMaw gives you an in-depth understanding of the basic theory and many practical circuit examples that use cores and coils.

For more information, see your favorite book dealer or MFJ Enterprises, 300 Industrial Park Rd., Mississippi State, MS 39762.

MFJ New High Pass TVI Filter

MFJ Enterprises announces their new MFJ-711 high pass TVI filter. It is for use between the cable and VCR or TV set to reduce TV interference from nearby radio transmitters. The MFJ-711 has an impedance of 75 unbalanced/300 balanced and uses CATV (type F) connectors.

For more information, contact your nearest MFJ dealer, or call MFJ Enterprises at (601) 323-5869

The SERA Repeater Journal Southeastern 1997 HAMFEST/CONVENTION SCHEDULE

FEBRUARY, 1997

-by MIKE BRIGHAM, W1CLS

558-J Eleanor Ct., Newport News, VA 23602
e-mail: mbrigham@ix.netcom.com

With news from Virginia -

Hi my name is Mike Brigham and I will be handling the repeater news in Virginia, east of a line from Harrisonburg to South Boston. Being as far east as I am, Newport News, I need everyone's help in the western part of my territory for news. Sure I could use some help in the East too. Actually I could use all the help I can get everywhere. All you club newsletter editors please put me on your list for a copy your newsletter. Please send to: Snail Mail - Mike Brigham 558-J Eleanor Ct., Newport News, Virginia 23602; Phone 757-898-1345; Email - mbrigham@ix.netcom.com

If you want to see something about your goings on please contact me as soon as you can and I'll get it in the SERA Journal as soon as is possible.

Now to me, well I've lived on the Peninsula since 1967, before that in New England.

I've been in amateur radio for almost six years. The reason for my call, W1CLS, is the vanity call sign program. My old call was KD4AUU, the new call was my grandfather's call from up in Massachusetts back in the old days. I'm a Emergency Coordinator for ARES in Poquoson and the assistant EC in York County. I am the programmer for the Peninsula Amateur Radio Club's repeater in Newport News. In my spare time I work 40 hours a week repairing computers on site. Enough about me, I want to hear from you!

One quick thing in the news is that in Newport News the City recently considered a new ordinance whereby the maximum height a tower could be was 15 feet above the closest structure.

After careful reconsideration and help of the local amateurs they changed the allowed height to 75 feet overall above ground level. Please stay in touch with your local government to make sure they really do represent you, the taxpayer.

Well that's all for now, but remember that the next issue deadline is just around the corner, we will have to send it in on April 1st for the May issue of the Repeater Journal. So I hope I may count on you hams in Virginia to help me get a little writing going about our state in the Repeater Journal.

Financial Report - by Ray Adams W4CPA

Correction to our Hurricane Coverage from last issue

A couple of corrections in last quarter's article on North Carolina ham's response to hurricane Fran:

It turns out that Governor Hunt didn't just happen by the state EOC amateur station in Raleigh the evening that Fran was bearing down on the coast. The governor was actively solicited by Tommy Babb, KF4JKQ. Tommy did a lot of PR work for ham radio during the Fran effort, including getting an article published in the Garner, NC, newspaper. Tommy also spent a lot of time on the air at the EOC station.

Governor Hunt responded by visiting the EOC station, where he talked via the PCRN link to Glenn Cox, KE4BMY, at the Wilmington NWS office (We had incorrectly written that Rick Tharrington, KD4JRX, was the operator in Wilmington).

Our thanks to Gary Pierce, KN4AQ, ARRL PIO for bringing this to our attention. (editor)

Have you always wanted to operate "Air Mobile?"

AIR TIME FOR SALE!!!!

Have you always wanted to operate your ham handheld AIR MOBILE? Being able to operate Air-Mobile is a very fun and exciting experience for any Amateur operator. If you purchase Air Time with a qualified Commercial Pilot, you will be able to select the route and the altitude of the flight. All flights are conducted in an FAA approved aircraft (commercial operations), and are fully insured for commercial flight activities. Your pilot, also a ham, has over 2,500 hours of piloting experience, plus:

- Your Aircraft is a modern four passenger
- FAA Certified flight instruction is available
- You get to select your operational altitude

- You get to select your route of flight
- Operations may be conducted day or night
- Some restrictions to weight may apply

For more information about an Exciting Air Mobile operation - Call Steve Siske, WD4BQW in Asheville NC, for Quote and Schedules

COMET

MODERN, MULTI-BAND ANTENNA SYSTEMS

MOBILE ANTENNA PRODUCTS

Modern, high-performance stations use COMET Antennas, Duplexers, Triplexers and Accessories! COMET products are designed to provide an exceptional level of signal quality and coverage area. Whether operating mobile or from your base station, COMET products make you sound good. No other product line has the selection, convenience, quality and performance!

DUAL-BAND MOBILE ANTENNAS

FL-67S Dual-Band 146/446MHz w/Fold-Over, No Ground Plane Required
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 4.5dBi ½ wave 1.5:1 or less 150 watts 4' 11" Gold Plated PL-259
 446MHz 7.2dBi ¾ wave x 3

FL-62S Dual-Band 146/446MHz w/Fold-Over, No Ground Plane Required
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 3.5dBi ½ wave 1.5:1 or less 150 watts 3' 5" Gold Plated PL-259
 446MHz 6.0dBi ¾ wave x 2

NEW! **SB-7/SB-7NMO** Dual-Band 146/446MHz w/Fold-Over, No Ground Plane Required
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 4.5dBi ½ wave 1.5:1 or less 70W FM 4' 7" PL-259 or NMO style
 center-loaded
 446MHz 7.2dBi ¾ wave x 3

NEW! **SB-5/SB-5NMO** Dual-Band 146/446MHz w/Fold-Over, No Ground Plane Required
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 3.0dBi ½ wave 1.5:1 or less 120W FM 38" PL-259 or NMO style
 446MHz 5.5dBi ¾ wave x 2

NEW! **SB-2/SB-2NMO** Dual-Band 146/446MHz
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 2.15dBi ¼ wave 1.5:1 or less 60W FM 18" PL-259 or NMO style
 446MHz 3.8dBi ¾ wave

B-10/B-10NMO Dual-Band 146/446MHz, Cellular Look-a-like
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 0dBi ¼ wave 1.5:1 or less 50W FM 12" PL-259 or NMO style
 446MHz 2.15dBi ½ wave

B-20/B-20NMO Dual-Band 146/446MHz, Cellular Appearance, No Ground Plane Required
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 2.15dBi ½ wave 1.5:1 or less 50 watts 30" PL-259 or NMO style
 446MHz 5.0dBi ¾ wave x 2

NEW! **SB-25/SB-25NMO** Mono-Band 146MHz w/Fold-Over, No Ground Plane Required
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 4.1dBi ¾ wave 1.5:1 or less 100W FM 4' 9" PL-259 or NMO style
 center loaded

COMET products are available from most major dealers. For customer service, or a complete catalog, please call us at 800/962-2611. We're confident COMET products and accessories will enable you to enjoy Amateur Radio to its fullest!

MINI SPEAKER/MIC

HM-P2K/F
 Mini spkr/mic featuring full TX/RX quality!
 Light weight, extremely small: 1" x 2" with collar pocket clip.
 HM-P2K: Kenwood Version
 HM-P2F: Icom/Yaesu Standard/Airco/etc.

TRI-BAND MOBILE ANTENNAS

CX-224/224NMO Tri-Band 146/220/446MHz, w/Fold-Over, No Ground Plane Required
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 2.15dBi ¼ wave 1.5:1 or less 100 watts 3' PL-259 or NMO style
 220MHz 3.6dBi ¾ wave
 446MHz 6.0dBi ¾ wave x 2

FJ-15S Tri-Band 52/146/446MHz w/Fold-Over
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 52MHz 2.15dBi ¼ wave 1.5:1 or less 120 W FM 4' 10" PL-259
 146MHz 4.5dBi ¾ wave
 446MHz 7.2dBi ¾ wave x 3

HF MOBILE AND HT ANTENNAS

HA-4S Quad-Band HF 40*/(20)/15/12/10 Meters w/Fold-Over
Wave: **VSWR:** **Weight:** **Length:** **Max Power:** **Connector:**
 ¼ wave 2:1 or less 1 lb. 14 oz. 4' 4" 120W SSB (200W SSB 28MHz)
 *L-14HS Optional 20 Meter Coil

SH-55 Super Flexible 146/446MHz HT Antenna
Gain & Wave: **Max Power:** **Length:** **Connector:**
 146MHz 1.5dBi ¼ wave 10 watts 15.5' BNC
 446MHz 3.2dBi ¾ wave x 2

NEW! **CH-722SA** High Gain HT Antenna
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 3.0dBi ¾ wave 1.5:1 or less 50 watts 35' 2 sections, 18" each
 446MHz 5.5dBi ¾ wave x 2
 Connector: BNC

CH-32 Miracle Baby 146/446MHz HT Antenna
Gain & Wave: **VSWR:** **Max Power:** **Length:** **Connector:**
 146MHz 0dBi ¼ wave 1.5:1 or less 10 watts 1.75' BNC

DUPLEXERS AND MOBILE MOUNTS

CF-4106K, I, J,
 146/446MHz
Band Pass, Ins Loss, Max Pwr:
 1.3-150MHz: 0.1dB, 800W PEP
 400-540MHz: 0.2dB, 500W PEP
 Isolation: >60dB
CONNECTORS:
 4106K 4160I 4160J
 Output: SO-239 SO-239 SO-239
 Low In: PL-259 PL-259 SO-239
 High In: PL-259 N-Male SO-239

RS-21
 Trunk, hatchback, rear door (van, blazer, etc.) mount. Adjustable to virtually ANY angle. Rubber-coated base protects vehicle paint.

NEW! **RS-820**
 Heavy-Duty, Low Profile Trunk Lip or Hatch Back Mount. Rubber-coated base protects vehicle paint.

WS-1M
 Multi-Adjustable Window Clip Mount. 11.5 feet of high quality coax. Gold-plated UHF Coax for Antennas up to 40" in height.

3D4M Standard Cable Assembly
 13.5 feet of low loss coax. Gold plated UHF (PL-259/SO-239) connectors.
3D5M Standard Cable Assembly
 Same as 3D4M, but 17 feet of coax

CK-5M Deluxe Cable Assembly
 13 feet double shielded very low loss coax + 12' RG-188 teflon coax. Gold plated UHF (PL-259/SO-239) connectors.
CK-5MS Deluxe Cable Assembly
 Same as CK-5M, but 17 feet of coax

NEW!
